

Summer 2020

Dear [prospective student]

Hello! My name is Michael Neff, Director of the Molecular Plant Sciences Graduate Program at Washington State University. I'm delighted to have received your contact information from the GRE Search, a program in which you participated. I'm following up to provide you with information based on your expressed interest.

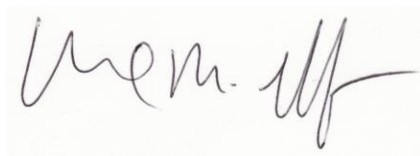

There are many opportunities at Washington State University, where our distinguished faculty members are dedicated to ensuring a high-quality education for all students. Our graduate program specializes in many aspects of plant-related research, from fundamental to applied.

We care deeply about graduate students at WSU and take their education seriously. That's why we promote new scholarship, assistantship, and fellowship opportunities to help reduce financial burdens, and we advocate for faculty mentorship and student leadership experiences. We are also proud that WSU is a warm, safe, and supportive community of scholars that fosters diversity, organizational integrity, and encourages cultural individuality.

We know you have many options for your graduate education and hope you will explore the opportunities through the WSU Molecular Plant Sciences Program. To find out more, visit our program website at www.mps.wsu.edu. There you will find more detailed information about our faculty, research, and opportunities for students.

We look forward to speaking with you about how you can become part of Washington State University's Molecular Plant Sciences Graduate Research Program.

Sincerely,

Michael M. Neff Ph.D.
