

Course Review:	NURS 509: Primary Care Management of Common Acute Conditions	Contact:	Cindy Fitzgerald cefitzgerald@wsu.edu
Faculty Reviewer:	Sue Marsh Megan Slaker	Review Date:	April 7, 15

Background:

The WSU Registrar received a major curricular change form from the College of Nursing requesting to establish NURS 509: Primary Care Management of Common Acute Conditions as a new 3 credit course for the Doctor of Nursing Practice (DNP) degree.

Reviewer Comments:

- The College of Nursing has revised the DNP program and curriculum as per the requirements of external body that accredits the DNP and its graduates. The addition of a stand-alone course in differential diagnoses and treatment planning in primary care practice is a requirement for students enrolled in the family nurse practitioner track.
- The provided rationale for the new course is acceptable and all of the required syllabus components are present.

Reviewer's Final Assessment:

The course syllabus is well written and comprehensive and the course appears rigorous and clearly enhances the professional graduate experience for students in the DNP program.

The Motions:

We move to approve the request to establish NURS 509: Primary Care Management of Common Acute Conditions.
