About the Graduate Catalog

The Washington State University (WSU) Graduate Catalog provides a listing of the graduate degrees and certificates offered at Washington State University. Each degree or certificate is listed along with application deadlines and requirements, websites, campus locations, and contact information for the program offering the degree or certificate. This catalog supplements the material in the Washington State University General Catalog, the Graduate School Policies and Procedures, and each program or department’s individual graduate handbook. Chosen courses for each student completing a graduate degree are detailed in their individual Program of Study. More information on Washington State University’s course offerings may be found in the Schedules of Classes.

The Washington State University General Catalog contains general information about WSU, its faculty, academic regulations, and a complete list of undergraduate, graduate, and professional courses. It contains the specific requirements for all undergraduate and professional degrees.

The Graduate School Policies and Procedures website outlines the general requirements for master’s, professional master’s, doctoral, and DNP degrees. Minimum course requirements for each type of degree, final and preliminary exam structures and protocol, the appeal process, and general guidelines can be found in the Graduate School Policies and Procedures. provides the most current information on Graduate School deadlines, procedures, and forms. Navigating Your Degree provides the most current information on Graduate School deadlines, procedures, and forms.

The degree requirements of graduate students extend beyond a coursework-centric education to include a dynamic, mentored research experience and project-based experiential learning. To detail the policies and practices of these educational experiences, each graduate degree program outlines the tasks necessary to succeed in their graduate program handbook. Graduate Program handbooks specify the required courses and credits, types of graduate qualifying exams, general procedures, internships, and milestones for each student.

The student’s Program of Study is a Graduate School Form that outlines the student’s chosen courses. Depending on the program, graduate students may have a great deal of flexibility in working with an advisory committee to design a tailored program, or they may move through a set of prescribed courses with a cohort. The graduate student files their Program of Study with the Graduate School, and it becomes the contract for course work required between the student and Washington State University.

The Schedules of Classes give additional detailed information about courses offered, class hours, and classroom locations for each semester. They also contain the latest calendar dates, fees, and details about registration.

All information in the Washington State University Graduate Catalog is subject to change without notice and students assume the responsibility of consulting the appropriate academic unit or advisor for more current or specific information.

Degree Programs by College

College of Agriculture, Human, and Natural Resource Sciences

Agricultural Economics, PhD
College of Agricultural, Human, and Natural Resource Sciences School of Economic Sciences
Website: ses.wsu.edu/graduatestudies/phdprograms/
Description: The Ph.D. in Agricultural Economics is designed to provide the student with an excellent foundation in the theory and methods of economic analysis as well as experience in applied analysis of agricultural, agribusiness, and/or natural resource economics problems. Career opportunities for agricultural economists also include academia, government, and the private sector. Many academic positions (especially at land grant universities) include salary support for a combination of teaching, research, and/or outreach related to the food and fiber sectors and the natural resource base that supports them.
Location(s): Pullman
Admission and Degree Requirements: See admission requirements at ses.wsu.edu/graduatestudies/phdprograms/ and School of Economic Sciences Graduate Manual at ses.wsu.edu/helpful-information/
Application Deadline: Fall, January 10
Minimum Required Credits: 39 graded; 20 doctoral research; 72 total (post-baccalaureate)

Contact Information:
Jeffrey Luckstead, PhD, Graduate Director
School of Economic Sciences

Agriculture, MS
College of Agricultural, Human, and Natural Resource Sciences
Interdisciplinary degree
Website: msag.wsu.edu
Description: The M.S. in Agriculture program is designed to provide practitioners and professionals an opportunity to strengthen and diversify their expertise in agriculture-related disciplines. The program is completely web-based and can be completed from anywhere in the world, although students may choose to take courses on the Pullman campus. Outstanding faculty participate from a diverse array of academic disciplines, including animal science, crop and soil sciences, entomology, horticulture, plant pathology, food science, and economic sciences, which makes the program truly interdisciplinary. With support from an advising committee, students can tailor their coursework to meet their personal and professional learning goals. To enable students to become outstanding educators and practitioners in agricultural disciplines, the program will foster the development of excellent communication and teaching skills, as well as a comprehensive understanding of research approaches used to address agricultural issues. Both thesis (research emphasis) and nonthesis (coursework emphasis) tracks are available to students pursuing the M.S. in Agriculture degree. Options for study include Agriculture (general), Agriculture Plant Health Management, and Agriculture Food Science and Management.
Location(s): Global Campus
Admission and Degree Requirements: See admission requirements and Program Handbook at msag.wsu.edu/futurestudents/
Application Deadline: Fall, June 1; Summer, March 1; Spring, October 1
Minimum Required Credits: nonthesis (26 graded, 30 total); thesis (21 graded, 30 total)
Animal Sciences, PhD
College of Agricultural, Human, and Natural Resource Sciences
Department of Animal Sciences
Website: ansci.wsu.edu/graduate/
Description: Programs are flexible and designed to meet the needs and interests of the student and, as such, specific degree requirements are determined through individual consultation with an advisor and a special committee. The department maintains herds of dairy cattle, beef cattle, and aquaculture fish for research and teaching purposes and on an as needed basis has access to swine, sheep, and equine animals. Thesis track only.
Location(s): Pullman
Admission and Degree Requirements: See the admission requirements at gradschool.wsu.edu/degrees/factsheet/master-of-science-in-animal-sciences/ and Graduate Student Handbook at ansci.wsu.edu/graduate/
Application Deadline: Fall, January 10; Spring, July 1
Minimum Required Credits: 22 graded; 50 thesis research; 72 total
Contact Information:

Apparel, Merchandising, Design and Textiles, MS
College of Agricultural, Human, and Natural Resource Sciences Department of Apparel, Merchandising, Design and Textiles
Website: amdt.wsu.edu/graduate/
Description: Opportunities available with the AMDT master’s program include individualized, in-depth programs of study; nationally and internationally recognized faculty; faculty research grants to support students; publications in refereed research journals; designs and creative work in juried exhibits; competitive assistantships; and graduate internships. The master’s program provides students with opportunities to pursue research through the completion of a thesis or project. Research areas for a thesis or project include Apparel Product Development, Textile Product Development, Smart Textiles, Consumer Behavior Studies; Creative Scholarship and Design; Global Sourcing, Fashion Marketing, Supply Chain Management, Electronic Commerce, Mobile Commerce, Social Media Commerce, Omnichannel Retailing, Sustainability, Corporate Social Responsibility, Life Cycle Analysis.
Location(s): Pullman

Applied Economics, Master of Applied Economics (MAE)
College of Agricultural, Human, and Natural Resource Sciences
School of Economic Sciences
Website: Master of Applied Economics at WSU | Washington State University

Description: This professional master’s degree focuses on applied economics and data analytics. The degree improves the student’s Economics preparation and emphasizes the utilization of quantitative techniques. It can be taken by students with Business, Finance, Engineering backgrounds with basic training in Microeconomics, Macroeconomics, and Econometrics/Statistics. Its focus is on the application of economics, preparing students for careers in business, consulting, NGOs, and government.

Location(s): Pullman

Admission and Degree Requirements:

Application Deadline: Fall, January 10

Required Credits: 27 graded semester credits

Contact Information:
Michael Brady, PhD, Director of the MAE Program

Biological and Agricultural Engineering PhD
College of Agricultural, Human, and Natural Resource Sciences
Department of Biological Systems Engineering
Website: bsysse.wsu.edu/

Description: The department offers the Ph.D. degree with four research areas of emphasis: Bioenergy and Bioproducts Engineering; Food Engineering; Land, Air, Water Resources and Environmental Engineering; and Agricultural Automation Engineering. Faculty are housed at WSU Pullman as well as at the Prosser Research and Extension Center, Puyallup Research Station and Richland, WA at WSU Tri-Cities Campus.

Location(s): Pullman

Admission and Degree Requirements:
See admission requirements at bsysse.wsu.edu/graduate-program/phd-guidelines/ and BSE Graduate Program Handbook at bsysse.wsu.edu/graduate-program/current-students/

Application Deadline: Fall, January 10; Spring, July 1

Minimum Required Credits: 15 graded (500-level); 20 BSysE 800 credits; 72 total

Contact Information:

Crop Science, PhD
College of Agricultural, Human, and Natural Resource Sciences
Department of Crop and Soil Sciences
Website: css.wsu.edu/graduate-studies/ Description: This program allows students to conduct graduate research in a variety of specialized areas within each discipline. Current research in Crop Science is being conducted in the areas of plant breeding, genomics, molecular genetics, grass management, and weed science. We work with wheat, forages, barley, alternative grains (quinoa, spelt, oats), grain legumes, brassicas, and turf. We have many research projects in cooperation with the United States Department of Agriculture (USDA) through the USDA Agricultural Research Service (USDA-ARS) and USDA Natural Resources Conservation Service (USDA-NRCS), and research projects being conducted statewide at WSU’s Research and Extension Centers, and in association with other universities.
Location(s): Pullman
Admission and Degree Requirements: In addition to the Graduate School admission requirements, a personal statement of the applicant’s educational goals and professional expectations and three letters of reference. Undergraduates who anticipate graduate study in Crop Science at Washington State University should have a solid B.S. level background in mathematics, chemistry, and the biological sciences. See https://css.wsu.edu/graduate-studies/handbook/ for degree requirements.
Application Deadline: Priority application deadlines are January 10 for Fall term applications and July 1 for Spring term applications. Minimum Required Credits: 15 500-level graded; 20 doctoral research; 72 total.

Contact Information:

Economics, PhD

College of Agricultural, Human, and Natural Resource Sciences
School of Economic Sciences

Website: ses.wsu.edu/graduatestudies/phdprograms/

Description: The Ph.D. in Economics is designed to prepare students for careers as professional economists in academia, government, and the private sector. The program is structured so that a student with a Bachelor of Arts degree in Economics and an appointment as a graduate assistant should be able to complete the required coursework within three academic years, excluding summer sessions. Students with a Master of Arts in Applied Economics degree may be able to complete the required coursework in less time, depending on the content and quality of the previous work.

Location(s): Pullman

Admission and Degree Requirements: See admission requirements at ses.wsu.edu/graduatestudies/phdprograms/ and Graduate Studies Manual at ses.wsu.edu/graduatestudies/

Application Deadline: Fall, January 10

Minimum Required Credits: 39 graded; 20 doctoral research; 72 total (post-baccalaureate)

Economics, MS
College of Agricultural, Human, and Natural Resource Sciences
School of Economic Sciences
Website: ses.wsu.edu/graduatestudies/msprograms/masters-in-applied-economics-at-wsu/
Description: The program provides strong foundations in economic theory, quantitative methods, applications, communication skills, and research analysis. Students can focus their studies on general economics, agribusiness, or agricultural and resource economics by carefully selecting supporting and elective courses. Students can earn an M.S. in Economics to specifically prepare for positions in private corporations and government service as management specialists, policy analysts, forecasters, or economic consultants. Thesis and nonthesis options.
Location(s): Pullman
Admission and Degree Requirements: See admission requirements at ses.wsu.edu/graduatestudies/msprograms/requirements/ and Graduate Studies Manual at ses.wsu.edu/helpful-information/
Application Deadline: Fall, January 10
Minimum Required Credits: thesis (24 graded, 30 total); nonthesis (27 graded, 31 total)

Entomology, PhD
College of Agricultural, Human, and Natural Resource Sciences
Department of Entomology
Website: entomology.wsu.edu/prospective-students/graduate-program/
Description: Facilities and training are available for graduate study in major areas of entomology, including (but not limited to) apiculture; behavior; integrated biological control and sustainable pest management; ecology; forest entomology; insect/plant interactions; medical/veterinary entomology; population genetics; physiology; systematic; biological diversity and environmental toxicology. Departmental faculty, adjunct faculty, and affiliate faculty may all serve as student advisors. Faculty are housed both on campus and at Research and Extension Centers throughout the state; the ability to significantly interact with both on- and off-campus advisors and mentors offers students opportunities and perspectives not available in most programs. We maintain strong cooperative interactions with the USDA ARS lab in Yakima, Washington. Students whose major advisor resides at a Research and Extension Center (Wenatchee, Prosser, Puyallup, Mt. Vernon, or USDA Wapato) typically come to Pullman for at least two semesters then relocate to the center where they will conduct their research and take the remainder of their coursework via interactive videoconference. Each student’s program of study is individualized based on research interests, prior academic experience, and collaboration with their major advisor.
Location(s): Pullman
Admission and Degree Requirements: See admission requirements at entomology.wsu.edu/prospective-students/graduate-program/application/ and Entomology Grad Student Handbook at entomology.wsu.edu/prospective-students/graduate-program/
Application Deadline: Fall, January 10; Spring, July 1
Minimum Required Credits: 15 graded (500-level); 20 research (Entom 800-level); 72 total

Departmental faculty, adjunct faculty, and affiliate faculty may all serve as student advisors. Faculty are housed both on campus and at research stations throughout the state; the ability to significantly interact with both on- and off-campus advisors and mentors offers students opportunities and perspectives not available in most programs. We maintain strong cooperative interactions with the USDA ARS lab in Yakima, Washington. Students whose major advisor resides at a Research and Extension Center (Wenatchee, Prosser, Puyallup, Mt. Vernon, or USDA Wapato) typically come to Pullman for at least two semesters then relocate to the center where they will conduct their research and take the remainder of their coursework via interactive videoconference. Each student’s program of study is individualized based on their research interests, prior academic experience, and collaboration with their major advisor.

**Location(s):** Pullman

**Admission and Degree Requirements:** See admission requirements at [entomology.wsu.edu/prospective-students/graduate-program/application/](http://entomology.wsu.edu/prospective-students/graduate-program/application/) and *Entomology Grad Student Handbook* at [entomology.wsu.edu/prospective-students/graduate-program/](http://entomology.wsu.edu/prospective-students/graduate-program/)

**Application Deadline:** Fall, January 10; Spring, July 1

**Minimum Required Credits:** *thesis* (21 graded, Entom 700 (4cr), 30 total), *nonthesis* (26 graded, Entom 702 (4cr), 30 total)

Environmental and Natural Resource Sciences, PhD

*College of Agricultural, Human, and Natural Resource Sciences*

*College of Arts and Sciences*

*School of the Environment*

**Website:** [environment.wsu.edu/graduate-studies/phd/](http://environment.wsu.edu/graduate-studies/phd/)

**Description:** Environmental and natural resource sciences comprise an association of several areas of study at WSU. These sciences focus on factors related to the understanding and management of the environment and therefore have a commonality of interest. The Ph.D. program provides opportunities for doctoral study that involve integration and interaction among the various fields of science. The cooperation of WSU’s faculty in environmental and natural resource sciences fosters important exchanges of knowledge that greatly enhance interdisciplinary education. The Ph.D. dissertation should be a significant contribution to the environmental and the natural resource sciences, worth of publication in referred international journals, contributions to the environment and natural resource sciences, worth of publication in referred international journals.

**Location(s):** Pullman, Vancouver, Tri-cities

**Admission and Degree Requirements:** See admission requirements at [environment.wsu.edu/graduate-studies/admission-process/](http://environment.wsu.edu/graduate-studies/admission-process/). Contact School of the Environment for degree requirements.

**Application Deadline:** Fall, January 10; Spring, July 1

**Minimum Required Credits:** 15 graded (for students with M.S.) and 17 graded (for students with B.S.); SOE 800 (20cr); 72 total

Environmental Science, MS
College of Agricultural, Human, and Natural Resource Sciences
College of Arts and Sciences
School of the Environment

Website: environment.wsu.edu/graduate-studies/masters/

Description: The M.S. degree in an interdisciplinary program with the flexibility for elective classes in the student’s own area of specialization. In consultation with their advisor, students may select classes from a wide variety of areas (i.e., Ecosystem science and management, social science as applied to ecosystem/land management, ecological and land use planning, land and water conservation, air quality management, water quality management, energy, and carbon policies). Most students conclude their M.S. Studies with a thesis where the goal is a publishable contribution. Thesis and nonthesis options.

Location(s): Pullman, Vancouver and Tri-Cities

Admission and Degree Requirements: See admission requirements at environment.wsu.edu/graduate-studies/admission-process/. Contact School of the Environment for degree requirements.

Application Deadline: Fall, January 10; Spring, July 1

Degree requirements: thesis (21 graded, SOE 700 (4cr), 30 total); nonthesis (20 graded, SOE 701 (4cr), 30 total)

Food Science, PhD
College of Agricultural, Human, and Natural Resource Sciences
School of Food Science

Website: sfs.wsu.edu/prospective-graduate-program/

Description: Food Science is a multidisciplinary science that applies biology, chemistry, physics, engineering, nutrition, and other sciences to improve the safety and quality of food products; develop new food products; and design new, safer, and more energy efficient food preservation methods. Our curriculum emphasizes courses in food processing, food chemistry, food microbiology, sensory evaluation, food quality and regulatory compliance, and other specialized areas. Examples include the processing and manufacturing of cereal, dairy, fruit, and vegetable products, including cheeses, wines, and potatoes. Faculty are housed at WSU Pullman as well as at the Prosser Research and Extension Center, and Wine Science Center on the WSU-Tri-Cities campus. Each student’s program of study is individualized based upon their research interests, prior academic experience, and in collaboration with their major advisor. The School of Food Science (SFS) also works closely with faculty at nearby University of Idaho (UI); some required coursework may be offered through the WSU/UI Coop program.

Location(s): Pullman

Admission and Degree Requirements: Contact Johnson Hall Graduate Center for admission and degree requirements

Application Deadline: Fall, January 10; Spring, July 1

Minimum Required Credits: 34 graded (15cr 500-level); Core coursework; 45 research (FS 800-level); 78 total

Natural Resource Sciences, MS
College of Arts and Sciences
College of Agricultural, Human, and Natural Resource Sciences
School of the Environment

Description: The School of the Environment offers a program of graduate study and research leading to a Master of Science in Natural Resource Sciences. The M.S. in Natural Resource Sciences emphasizes original research by the student. This degree provides an atmosphere of scholarship coupled with research opportunities that produces people capable of responding to the complicated issues of use, management, protection of the environment and its natural resources. The department has laboratory facilities and greenhouses on campus. Field facilities are located at the Collockum Multiple-Use Research Unit located near Wenatchee, WA. The University of Idaho is eight miles from the Pullman campus and offers cross-listed courses in conjunction with WSU in natural resource management sciences.
Location(s): Pullman
Application Deadline: Not recruiting for 2021-22. Degree anticipating closure. Contact program for more information regarding degrees.

Plant Pathology, PhD
College of Agricultural, Human, and Natural Resource Sciences
Department of Plant Pathology
Website: plantpath.wsu.edu/prospective-students/
Description: Doctorate in Plant Pathology requires graded course work and completion of dissertation research. The degree involves study in mycology, bacteriology, nematology, virology, disease physiology and biochemistry, molecular biology of host-parasite relationships, etiology, ecology and epidemiology of plant diseases, disease resistance, and integrated disease management by developing and deploying cultural, chemical, biological, and biotechnological approaches.
Location(s): Pullman
Admission and Degree Requirements: See admission requirements at plantpath.wsu.edu/prospective-students/application-checklist/ and Department Student Handbook at plantpath.wsu.edu/current-students/previous-student-handbooks/
Application Deadline: Fall, January 10; Spring, July 1 Minimum Required Credits: 34 graded (25 min 500-level); 20 research (PL_P 800-level); 72 total
Plant Pathology, MS

*College of Agricultural, Human, and Natural Resource Sciences*

**Description:** Plant Pathology is the study of plant diseases caused by pathogens and environmental factors; it involves study in mycology, bacteriology, nematology, virology, disease physiology and biochemistry, molecular biology of host-parasite relationships, etiology, ecology and epidemiology of plant diseases, disease resistance, and integrated disease management using cultural, chemical, biological, and biotechnological approaches. Because of its broad mission, the Department of Plant Pathology has strong interrelationships with all other plant- and biology-oriented departments and commodity groups within the state and nationally and internationally. The mission of the department reflects the strategic goals of Washington State University by advancing knowledge of plant pathology through creative research and scholarship, by extending that knowledge worldwide through the training of graduate students, and by applying the knowledge to protect the quality and quantity of the local and global food supply.

**Location(s):** Pullman

Prevention Science, PhD

*College of Agricultural, Human, and Natural Resource Sciences*

**Department of Human Development**

**Website:** [hd.wsu.edu/preventionscience/](http://hd.wsu.edu/preventionscience/)

**Description:** The Ph.D. program in Prevention Science at Washington State University is an interdisciplinary program; participating faculty are from Human Development, Communication, Educational Psychology, Kinesiology, Psychology, Nursing, Medicine, and Extension. The program emphasizes training in both the generation of research-based knowledge and its translation into effective programs and policies that positively impact the well-being of children, youth, adults, families, and their communities. Examples of prevention programs include drug and alcohol prevention programs; broad based youth development programs; and early childcare and learning quality improvement programs.

**Location(s):** Pullman, with participation systemwide

**Admission and Degree Requirements:** See admission requirements at [hd.wsu.edu/apply-to-graduate-program-2/](http://hd.wsu.edu/apply-to-graduate-program-2/) and Graduate Student Handbook at [hd.wsu.edu/preventionscience](http://hd.wsu.edu/preventionscience)

Prevention Science, MS

*College of Agricultural, Human, and Natural Resource Sciences*

**Department of Human Development**

**Note:** The M.S. in Prevention Science is only available to students in the Ph.D. program.
Soil Science, PhD
College of Agricultural, Human, and Natural Resource Sciences
Department of Crop and Soil Sciences
Website: css.wsu.edu/graduate-studies/ Description: Soils may be studied either as natural bodies or as a medium for chemical and biochemical interactions for transport of water, solutes, and heat, and for plant growth. Washington State University is located in one of the best geographical areas in the world for the study of soils as naturally occurring bodies. Graduate programs are usually designed to specialize in the physical, chemical, biological, mineralogical, geomorphological, or fertility aspects of the soil system. Current soil science research programs in which graduate students are participating include: unsaturated water flow; soil-plant relationships; stability of minerals and controls on heavy metal levels; nutrient budgets of cropping systems; movement and transformation of pesticides and xenobiotic chemicals; microbial ecology; fate of engineered microorganisms; phytotoxicity and crop residue management; no-till soil and crop management; fertility and mineral nutrition; soil interpretations for land use and development; benchmark soils; agricultural and urban waste recycling. We have many research projects in cooperation with the United States Department of Agriculture (USDA) through the USDA Agricultural Research Service (USDA-ARS) and USDA Natural Resources Conservation Service (USDA-NRCS), and research projects being conducted statewide at WSU’s Research and Extension Centers, and in association with other universities.

Location(s): Pullman
Admission and Degree Requirements: In addition to the Graduate School admission requirements, a personal statement of the applicant’s educational goals and professional expectations and three letters of reference. Undergraduates who anticipate graduate study in Crop Science at Washington State University should have a solid B.S. level background in mathematics, chemistry, and the biological sciences. See https://css.wsu.edu/graduate-studies/handbook/ for degree requirements
Application Deadline: Priority application deadlines are January 10 for Fall term applications and July 1 for Spring term applications.
Minimum Required Credits: 15 500-level graded; 20 doctoral research; 72 total

Contact Information:

Chemistry, PhD

College of Arts and Sciences
Department of Chemistry
Website: chem.wsu.edu/earning-a-ph-d/

Description
The Department of Chemistry offers courses of study leading to a Ph.D. degree with opportunities for research in seven fields: analytical, environmental, radiochemistry, materials chemistry, inorganic, organic and bioorganic, and physical chemistry. The low student-to-faculty ratio assures students of individual guidance, yet the total size of the department provides excellent facilities for research, including the latest instrumentation. The program of study for graduate students in the chemistry department provides a good balance between formal course work and research experience. In addition to the normal core classes, first-year graduate students also take a seminar course which provides a forum for the presentation and discussion of current research in chemistry within the department. With this exposure, students are typically comfortable selecting a research advisor by the end of their first semester. Individual divisions also have a weekly seminar program in which graduate students participate, gaining experience in presenting and discussing their own research.

Location(s): Pullman

Admission and Degree Requirements: See admission requirements at chem.wsu.edu/apply-now/ and Chemistry Graduate Handbook at chem.wsu.edu/grad-handbooks/

Chemistry, MS

College of Arts and Sciences
Department of Chemistry
Website: chem.wsu.edu/masters/

Description: While the WSU Chemistry graduate program emphasizes the Ph.D. degree, we appreciate that there are circumstances that favor awarding of the M.S. degree. The degree of Master of Science is awarded in recognition of scholarship and contributions to knowledge in the field of Chemistry. The Master’s Degree is based on research carried out in the laboratories of the Department and allows students to gain experience in modern experimental techniques and to familiarize themselves with the daily workings of a laboratory. Master’s Degree students (on either the thesis or nonthesis track) must carry out a research project under the supervision of a member of the Chemistry Department faculty. Master’s students are expected to participate fully in the scientific life of the Department and to attend the various meetings and seminars that take place.

Location(s): Pullman, Tri-Cities

Admission and Degree Requirements: See admission requirements at chem.wsu.edu/apply-now/ and Chemistry Graduate Handbook at chem.wsu.edu/grad-handbooks/

Application Deadline: Not accepting applications at the Pullman campus. Tri-Cities by pre-approval only.

Minimum Required Credits: thesis (21 graded, CHEM 700 (4cr), 30 total); nonthesis (26 graded, CHEM 702 (4cr), 30 total)

Criminal Justice and Criminology, PhD

College of Arts and Sciences
Department of Criminal Justice and Criminology

Website: crmj.wsu.edu/graduate-studies/ph-d-in-criminal-justice/

Description: The mission of the Criminal Justice and Criminology Ph.D. program is to provide an academic hub for students, stakeholders, and the community to come together to address pressing questions about crime and criminal justice. We promote justice, equity, and community well-being by engaging stakeholders in policy relevant research that enhances justice at the local, state, and national levels, and by providing students with skills and opportunities that will prepare them to work effectively in their careers as practitioners and researchers. Upon completion and onward of their graduate program, graduate students in criminal justice will be able to read and evaluate data and social science research, analyze, and develop criminal justice policy, conduct independent research related to criminology and criminal justice, and communicate original research findings and analyses of secondary research cogently for consideration by multiple audiences.

Location(s): Pullman

Admission and Degree Requirements: See admission requirements at crmj.wsu.edu/graduate-studies/admissions-application-information/ and Graduate Handbook at crmj.wsu.edu/graduate-studies/graduate-handbook-and-student-resources/

Application Deadline: Fall, January 10

Minimum Required Credits: 39 graded; CRMJ 800 (33cr); 72 total

Criminal Justice and Criminology, MA

College of Arts and Sciences
Department of Criminal Justice and Criminology

Website: crmj.wsu.edu/graduate-studies/m-a-in-criminal-justice/

Description: The mission of the Criminal Justice and Criminology M.A. program is to provide an academic hub for students, stakeholders, and the community to come together to address pressing questions about crime and criminal justice. We promote justice, equity, and community well-being by engaging stakeholders in policy relevant research that enhances justice at the local, state, and national levels, and by providing students with skills and opportunities that will prepare them to work effectively in their careers as practitioners and researchers. The MA degree in criminal justice is designed to develop and enhance the student's knowledge of criminal justice; expand and develop a student's analytical and assessment skills; and further develop their facility with oral and written communication and with research. The program is flexible and provides a superb basis for entry into graduate work at the doctoral level or applied work in criminal justice agencies.

Approximately 70% of our M.A. graduates are employed in applied settings while the balance has pursued teaching and research careers.

English, PhD

College of Arts and Sciences
Department of English

Website: english.wsu.edu/graduate-studies/

Description: The objective of the Ph.D. program – including concentrations either in literature or in rhetoric and composition – is to prepare scholars for employment in a wide variety of post-secondary institutions of learning by providing both generalized and specialized training in literary/cultural theory and criticism, as well
as opportunities to develop critical and research skills in literary and intellectual history, rhetorical theory, genre studies, composition studies, pedagogical theory, linguistics, and other related fields. The Ph.D. candidate’s course of study is not designed to confront the student with every significant piece of writing in the respective field (i.e., English, and American literature or rhetoric and composition). Rather, the coursework aims to produce mature critics and scholars who are widely read in English and American literature, knowledgeable about the methods of systematic scholarship, and competent to function professionally, not only in the modern university, but also in related research institutions such as historical societies, museums, and publishing firms.

**Location(s):** Pullman

**Admission and Degree Requirements:** See admission requirements at [english.wsu.edu/graduate-studies/applying-for-admission/](https://english.wsu.edu/graduate-studies/applying-for-admission/) and [Graduate Manual at english.wsu.edu/graduate-studies/current-graduate-manual/](https://english.wsu.edu/graduate-studies/current-graduate-manual/)

**Environmental and Natural Resource Sciences, PhD**

**College of Arts and Sciences**

**College of Agricultural, Human, and Natural Resource Sciences**

**School of the Environment**

**Website:** [environment.wsu.edu/graduate-studies/phd/](https://environment.wsu.edu/graduate-studies/phd/)

**Description:** Environmental and natural resource sciences comprise an association of several areas of study at WSU. These sciences focus on factors related to the understanding and management of the environment and therefore have a commonality of interest. The Ph.D. program provides opportunities for doctoral study that involve integration and interaction among the various fields of science. The cooperation of WSU’s faculty in environmental and natural resource sciences fosters important exchanges of knowledge that greatly enhances interdisciplinary education. The Ph.D. dissertation should be a significant contribution to the environmental and the natural resource sciences, worth of publication in referred international journals.

**Location(s):** Pullman, Vancouver, Tri-Cities

**Admission and Degree Requirements:** See admission requirements at [environment.wsu.edu/graduate-studies/admission-](https://environment.wsu.edu/graduate-studies/admission-).

Fine Arts, MFA

**College of Arts and Sciences**
**Department of Fine Arts**

**Website:** [finearts.wsu.edu/graduate-studies-2/](finearts.wsu.edu/graduate-studies-2/)

**Description:** The MFA program at Washington State University is a three-year interdisciplinary program where students may focus in, but are not limited to, ceramics, drawing, digital media, painting, photography, printmaking, and sculpture. Emphasis is placed on personal and conceptual artistic development considering contemporary art practices. Graduates meet with faculty for one-on-one studio discussions. First year students have a progress review at the end of their first semester and an exhibition in the departmental gallery at the end of their first year. At the end of the second year, they will meet with their thesis committee prior to the end of spring term. In the third year, the program culminates in a thesis exhibition held in the Jordan Schnitzer Museum of Art.

A final oral examination and a thesis document are also required.

**Location(s):** Pullman

History, PhD
College of Arts and Sciences
Department of History
Website: history.wsu.edu/graduate-studies/
Description: Students entering the PhD program in History are expected to have completed a master’s degree in History or in a related field of study at an accredited college or university, and to show promise of doing excellent work at the doctoral level. All doctoral candidates conduct independent research leading to a written dissertation, with the objective of making a major contribution to the body of academic knowledge in History. Research will be focused on a specific Primary Field, which is embedded in a broader General Field that gives a geographical, chronological, and historiographical framework for the research. The program will culminate with a final oral examination.
Location(s): Pullman
Admission and Degree Requirements: See admission requirements at history.wsu.edu/graduate-studies/admissions/ and History Graduate Student Handbook at history.wsu.edu/graduate-studies/ Application
Deadline: Fall, January 10

Mathematics, PhD

College of Arts and Sciences
Department of Mathematics and Statistics

Website: math.wsu.edu/graduatestudies/ Description: This degree is awarded in recognition of distinctive scholarship and original contributions to knowledge in Mathematics. The PhD program is especially designed to prepare the student for teaching at the graduate level, and doing mathematical research in academic settings, and in industrial and business settings. Students studying various fields within the realm of pure mathematics would be included in this PhD program. Students can also choose to pursue an emphasis in applied mathematics or education. The Applied Mathematics Option allows students from a range of backgrounds to pursue a traditional applied mathematics program, while retaining the option to thoroughly learn an area of application. The PhD in Mathematics with Education Emphasis is awarded in recognition of scholarship and original contributions to the teaching and learning of mathematics.

Location(s): Pullman

Admission and Degree Requirements: See admission and degree requirements at math.wsu.edu/graduatestudies/

Psychology (Clinical), PhD
College of Arts and Sciences Department of Psychology
Website: psychology.wsu.edu/clinical/
Description: The Clinical Psychology Program at Washington State University is based on the scientist-practitioner model of training. The Program is designed to integrate theory, research, and clinical practice in the training of students. Students are thus involved in research activities each semester in the Program and clinical practica beginning in the third semester until the start of the 12-month internship, typically in the 6th year. The goal of the program is to train highly competent clinical psychologists who will obtain high quality APA-accredited internships and, with graduation, make positive contributions to the field of clinical psychology. Given that our graduates can potentially make contributions to clinical psychology in academic, research, medical, clinical, or...
community settings dependent on their interests and goals, the Program provides broad, general training during the four to five years that students are at the University, which emphasizes clinical science. Areas of interest within the Clinical Psychology Program include Clinical Health and Primary Care Psychology, Neuropsychology, Adult Psychopathology, Developmental Clinical and Child/Adolescent Clinical Psychology, Diversity, and Quantitative Methods in Psychology. The Program is accredited by the American Psychological Association. For additional information about the program’s accreditation status, contact the Commission on Accreditation of the American Psychological Association at: Office of Program Consultation and Accreditation, 750 First Street, NE, Washington, DC 20002-4242, 202-336-5979 (phone), TDD/TTY: 202-336-6123, 202-336-5978 (fax), apaaccred@apa.org (email).

Psychology (Experimental), PhD
College of Arts and Sciences
Department of Psychology
Website: psychology.wsu.edu/experimental/
Description: The doctoral program in experimental psychology at Washington State University is designed to produce highly skilled, innovative, and productive experimental psychologists in terms of research and teaching. Each student will build their program of study around one or more specialty areas. Graduates will be highly knowledgeable about their specialty areas, have a strong background in general experimental psychology, be able to identify significant research problems, be conversant with a wide variety of strategies for generating and testing hypotheses that emerge from these problems, and be able to effectively communicate these ideas. It is expected that graduates will leave Washington State University well equipped to become successful professionals in competitive research and teaching positions in academia, as well as competitive research or applied positions in government and industry.

*College of Arts and Sciences*

*Department of Sociology*

**Website:** [soc.wsu.edu/graduate-program/prospective-graduate-students/](soc.wsu.edu/graduate-program/prospective-graduate-students/)

**Description:** The Sociology Program at Washington State is designed to integrate research and teaching in the training of students. Students have the opportunity for involvement in collaborative and independent research activities, facilitated by faculty led seminars and research programs. In addition to offering yearly teaching workshops for students who teach their own courses, students participate in a teaching seminar in their second year. The goal of the Program, and focus of graduate curriculum, is to train highly competent sociologists who will make constructive contributions to the field of sociology in academic, research, governmental, for-profit and community settings.

**Location(s):** Pullman

**Admission and Degree Requirements:** See admission requirements at [https://soc.wsu.edu/apply-for-admission/](https://soc.wsu.edu/apply-for-admission/) and the Sociology Graduate Student Handbook at [https://soc.wsu.edu/sociology-at-wsu/](https://soc.wsu.edu/sociology-at-wsu/)

**Application Deadline:** Fall, January 10

**Minimum Required Credits:** 34 graded; 20 research (800-level); 72 total

**Statistical Science, PhD**

*College of Arts and Sciences*

*Department of Mathematics and Statistics*

**Website:** [math.wsu.edu/graduatestudies/](math.wsu.edu/graduatestudies/)

**Description:** The PhD in Statistical Science is meant to give students both a strong background in statistics and a working knowledge in a secondary field. Applicants are expected to have a B.S. in statistics, mathematics, or a similar field with courses taken in probability theory and mathematical statistics/statistical theory. Core and elective statistics classes offered through the Department of Mathematics and Statistics are taken in addition to classes from a partnering allied department, such as Biology, Economics, Education, Mathematics, or Psychology. At least one member of the student’s committee is encouraged to be from the appropriate allied department in the student’s field of research. This creates an interdisciplinary curriculum designed to teach students to develop new statistical methods to solve real life problems that arise in their chosen area of concentration.

**Location(s):** Pullman

**Admission and Degree Requirements:** See admission and degree requirements at [math.wsu.edu/graduatestudies/](math.wsu.edu/graduatestudies/)

**Application Deadline:** Fall, January 10; Spring, August 10

**Minimum Required Credits:** 39 graded; STAT 800 (20cr); 72 total

**Business Administration (Finance), PhD**

*Carson College of Business*

*Department of Finance and Management Science*

**Website:** [business.wsu.edu/graduate-programs/phd-business/finance/](http://business.wsu.edu/graduate-programs/phd-business/finance/)

**Description:** The doctorate in business administration with an emphasis in finance at Washington State University is designed to prepare graduates for careers in research and teaching. The primary goal of the finance doctoral program is to train academics for placements at AACSB-accredited universities throughout the United States and abroad. The program encompasses a variety of formal and informal interactions and projects with faculty and others, as well as course work, comprehensive exams, teaching experience and dissertation research. It enables students to develop substantial competencies in the theory, practice, and research methodology essential to the advancement of finance knowledge, while accommodating individual backgrounds, experiences, and objectives. Course work covers topics associated with the scholarly pursuit of finance as well as topics from supporting fields of inquiry such as economics, accounting, and psychology. Extensive coverage of research methods and statistics associated with finance research is a large component of the program. In addition to specific coursework, the finance doctoral program also provides an environment in which students can develop research competencies in close association with the finance faculty and other graduate students.

Business Administration (Information Systems), PhD
Carson College of Business
Department of Management, Information Systems, and Entrepreneurship
Website: business.wsu.edu/graduate-programs/phd-business/information-systems/
Description: The PhD program in Information Systems aims to develop scholars: individuals who produce compelling original research that is published in the best journals in the field and who share knowledge through the practice of teaching. We aspire to place our students at peer institutions throughout the US and the world. Four learning objectives guide our program. Through your study at WSU, you will: 1) Develop comprehensive knowledge of theory and methods used in chosen field and related disciplines. Learn how to execute quality research, including the ability to plan, organize, design, construct, and execute research to assess/test research questions and/or hypotheses; 2) Develop ability to effectively communicate research in writing and oral presentations; 3) Become effective teachers; and 4) MIS doctoral programs vary in their focus. Three broad pillars define the field: technical, economic, and managerial. Our principal focus is the managerial pillar, with a strength in behavioral research methods.

Health Communication and Promotion, MA
Edward R. Murrow College of Communication
Website: murrow.wsu.edu/academics/murrow-online/
Description: Washington State University’s online master’s degree in Health Communication and Promotion is designed for those who work in communication fields and health sciences and are seeking to refresh and update their skills or specialize in health communication and promotion. The program is also tailored for individuals who want to enter the profession of health communication and promotion or enhance their credentials to meet Murrow College standards for ethics, integrity, and leadership within the field of health communication. Whether you have no training in health communication or are a seasoned professional, the degree will advance and energize your career. Our multidisciplinary approach: 1) Offers expertise in new and traditional media; 2) Teaches students how to gather and analyze information and use those findings in creating health and public awareness campaigns; 3) Furthers skills in analyzing information and designing health communication strategies, programs, and initiatives; 4) Advances student knowledge in communication monitoring, metrics and reporting effectiveness of outreach efforts; 5) Trains students, in the tradition of Edward R. Murrow, to create messages that are both strategic and responsible; and 6) Includes weekly online instructor office hours, frequent student self-assessment tools, ongoing interaction with other students, and a cohort structure in which students go through the program with the same group.
Location(s): Global Campus
Admission and Degree Requirements: See admission requirements and degree requirements at murrow.wsu.edu/academics/murrow-online/ma-comhlth/
Application Deadline: Fall, August 1; Spring, December 1; Summer, April 15

Strategic Communications, MA

Edward R. Murrow College of Communication

Website: murrow.wsu.edu/academics/murrow-online/

Description: Washington State University’s online MA in Strategic Communication is designed for those who want to excel in advertising, public relations, corporate communication, and communication management. This degree will advance and energize your career. Our multidisciplinary approach offers training in new and traditional media, critical for today’s strategic communications; teaches students how to gather and analyze information and use those findings in creating communication campaign; trains students, in the tradition of Edward R. Murrow, to create messages that are both strategic and responsible; includes weekly online instructor office hours, frequent student self-assessment tools, ongoing interaction with other students, and a flexible timeline for completion. The program offers hands-on training in the most advanced platforms, tools, and techniques. You will work closely with industry professionals and faculty to learn audio and video software, graphic design tools, new media, and publication layouts. By the time you are finished, you will have created multimedia materials that are evaluated by peers and produced as portfolio-quality items stored online. This work can be tailored to each individual career, or even your specific job needs.

College of Education

Athletic Training, MAT

College of Education
Department of Kinesiology and Educational Psychology

Website: education.wsu.edu/undergradprograms/athletictraining/

Description: The mission of the Athletic Training Program (ATP) at Washington State University (WSU) is to provide future athletic trainers with the highest quality of education, knowledge, and skills to enhance the health and well-being of physically active populations throughout our community and the world. Students who graduate from the program will be well-prepared for the Board of Certification (BOC) Examination and a future in helping all individuals safely participate in physical activity. As faculty, we educate our students with the most current evidence-based and practical knowledge while providing an example of expert, professional, and compassionate service. The MAT degree is a comprehensive 5-year program in conjunction with the B.S. in Sport Medicine, and all 5 years must be completed at WSU.

Location(s): Pullman

Admission and Degree Requirements: See admission and degree requirements at education.wsu.edu/undergradprograms/athletictraining/programoverview/

Application Deadline: Students apply to the MAT in the final semester of their B.S. degree.

Licensure: MAT degree allows the graduate to sit for the Board of Certification exam to become a certified AT and become eligible for licensure in most states.

Minimum Required Credits: 40 graded; capstone - ATH T 598 (3cr); 40 total

Cultural Studies and Social Thought in Education, PhD

College of Education
Department of Teaching and Learning
Website: education.wsu.edu/graduate/culturalstudies/

Description: The Doctor of Philosophy in Cultural Studies and Social Thought in Education (Ph.D.) is a rigorous, flexible, and individually tailored course of study that focuses on the issues of culture and power in the contemporary and historical contexts of education. Cultural Studies and Social Thought in Education (CSSTE) includes popular culture and media, social justice, environment, ethics, aesthetics, race, ethnicity, gender, and social class, which are applied to a range of educational sub-fields that include literacy, educational leadership, teacher leadership, school reform, curriculum theory, higher education, science, art, special education, and bilingual/ELL (English Language Learners). The overall goal of the faculty is to articulate a cohesive and supportive community of educational scholarship and practice. While coursework is important, we work to establish a strong program of mentorship in which doctoral candidates are mentored into the world of research, knowledge generation and dissemination, and pedagogical and social action. We are committed to the idea that our scholarly endeavors stimulate positive change in schools and the communities and society those schools serve. Education, whether it takes place in the formal settings of schools and museums or the informal contexts of home and the movie theater, is defined by its cultural context. Cultural studies take these cultural contexts as the essential starting point to build research projects and define teaching practices.

Curriculum and Instruction, MA

College of Education
Department of Teaching and Learning
Website: education.wsu.edu/graduate/curriculum/

Description: The Master of Arts in Curriculum and Instruction (M.A.) is a thesis degree designed for students who desire to study and explore educational research. The MA degree is well suited for those students wishing to eventually pursue a doctoral degree or a research/leadership role in schools or organizations/agencies. The Curriculum and Instruction specialization offers students rigorous and individually tailored programs of study. The master’s degree programs are designed for students with bachelor’s degrees who have an interest in deepening their knowledge in a specific content area (in or outside the College of Education) as well as educational research in curriculum and instruction. The program also emphasizes applying research, theory, and evidence-based practices to improve education. This specialization is designed especially for teachers who wish to take courses in their teaching field as well as advanced coursework in teaching and learning.

Location(s): Pullman

Admission and Degree Requirements: See admission requirements at education.wsu.edu/students/apply/ and T&L Master Handbook at education.wsu.edu/graduate/curriculum/ Application Deadline: Fall, January 10; Spring, July 1

Educational Leadership, EdD
College of Education
Department of Educational Leadership and Sport Management
Website: education.vancouver.wsu.edu/edd-educational-leadership
Description: The statewide Doctor of Education in Educational Leadership (Ed.D.) program prepares practitioner-scholars for leadership in education at the local, state, and national levels. Program content is both practical and scholarly; it blends issues important to practicing educational leaders with scholarship that can help analyze and address these issues. Program faculty are highly experienced school professionals and nationally recognized academic scholars who contribute to the central purpose of the program: preparing practitioner-scholars for effective and meaningful leadership. The Ed.D. dissertation is intended to study and address a contemporary problem of practice in K-20 schools through a leadership lens. This is a modified cohort program, with a new cohort admitted once each year in the fall. Students enrolled in two classes each semester will finish the coursework portion of their program in 2½ years. Students making continual progress could complete the degree in four years, though it is common for students balancing educational, professional, and personal demands to finish in five years. The maximum time to complete is 10 years. The program is offered on-site at all of WSU’s campuses (Pullman, Spokane, Tri-Cities, and Vancouver). Students who live 50+ miles from a WSU campus can seek approval to attend classes synchronously via Zoom Video Conferencing. The program is designed as a part-time, evening program for working professionals. During the fall and spring semesters each course is offered one night per week. Summer classes (required) are typically taught using a hybrid schedule, which would include a combination of videoconference class sessions, online activities, and one or more face-to-face weekend sessions on a WSU campus. WSU’s Educational Leadership program is one of 70 doctoral-granting programs nationwide selected for membership in the University Council for Educational Administration, a national consortium dedicated to the improvement of educational leadership preparation and practice.

Educational Psychology, PhD
College of Education
Department of Kinesiology and Educational Psychology
Website: education.wsu.edu/graduate/edpsych/
Description: Educational Psychology is the study of how humans learn and retain knowledge, primarily in educational settings like classrooms. This includes emotional, social, and cognitive learning processes. The Doctor of Philosophy in Educational Psychology (Ph.D.) degree program, with core requirements in research, evaluation, and measurement and learning theory, provides students with a solid academic foundation in educational measurement and evaluation. Assistantships for educational psychology students in the center provide unique opportunities to apply theoretical concepts and methodologies of program evaluation and educational and psychological measurement to specific practical projects in various educational settings through partnerships with school districts, state agencies, and other social service organizations. Successful professionals in this field have strong methodological skills, an understanding of researchable topics, the ability to develop a research program, the ability to communicate and work with a wide variety of professionals, and the skills to understand nuance and ambiguity in the work environment. Through faculty and student partnerships across campus, the program provides an exciting, interdisciplinary atmosphere for course and field study. Graduates in educational psychology can expect employment in private firms, school districts, universities, business, industry, or state agencies. For example, graduates work for: test companies as researchers, university as professors and researchers, and assessment offices across the United States.
Location(s): Pullman
Admission and Degree Requirements: See admission requirements at education.wsu.edu/students/apply/ and Ph.D. Educational Psychology Handbook at education.wsu.edu/graduate/edpsych/phd/
Application Deadline: Fall, December 1
Minimum Required Credits: 34 graded; ED_PSYCH 800 (22cr); 72 total
Educational Psychology, MA

College of Education
Department of Kinesiology and Educational Psychology
Website: education.wsu.edu/graduate/edpsych/
Description: Educational Psychology is the study of how humans learn and retain knowledge, primarily in educational settings like classrooms. This includes emotional, social, and cognitive learning processes. The Master of Arts (M.A.) in Educational Psychology is a thesis degree with a concentration in research, evaluation, psychometrics, and cognition. While students in educational psychology complete a common core of courses, a portion of each master’s degree program is composed of courses selected by the student and his/her advisory committee to tailor the program of study around the student's personal interests and professional aspirations. Recipients of the master’s degree in educational psychology are well prepared to continue doctoral level training if so desired. However, the master’s degree would give access to entry-level positions in this intriguing field that presents an ever-changing, challenging, and rewarding work environment. The M.A. requires the completion of a written thesis. Graduates in educational psychology can expect employment in private firms, school districts, universities, business, industry, or state agencies. For example, graduates work for: test companies as researchers, university as professors and researchers, and assessment offices across the United States.

Kinesiology, MS

College of Education
Department of Kinesiology and Educational Psychology
Website: education.wsu.edu/graduate/kinesiologygraduateprogram/
Description: The Master of Science in Kinesiology (M.S.) is the comprehensive study of multiple factors that affect human movement and is comprised of a wide range of sub-disciplines (e.g., exercise physiology, motor learning, biomechanics, physical activity, sport/exercise psychology). The mission of the kinesiology program is to generate, interpret, disseminate, and apply kinesiology discipline knowledge across various contexts to enhance health, productivity, and quality of life. Students will learn to take advantage of the interdisciplinary nature of the field for broad understanding of human movement behavior in different contexts. Students will gain a working knowledge of the various sub-disciplines in Kinesiology and the ability to see their connections. This degree offers a thesis and nonthesis track.

Location(s): Pullman
Admission and Degree Requirements: See admission requirements at education.wsu.edu/students/apply/ and degree requirements at education.wsu.edu/graduate/kinesiologygraduateprogram/kinesiology-graduate-program-program-content/

Special Education, PhD
College of Education
Department of Teaching and Learning
Website: education.wsu.edu/graduate/specialed/
Description: The Doctor of Philosophy in Special Education (Ph.D.) program emphasizes the generation, application, and translation of research that will enhance the field and improve the lives of those with disabilities. The program in special education includes the study of response to intervention across the curriculum, diversity issues, social development, and school-based prevention practices for students with social and behavioral adjustment problems, universal design, and single subject design in addition to the comprehensive Carnegie core of research courses in quantitative, qualitative and program evaluation research methods. The faculty support a strong program of mentorship and encourage doctoral students to work closely with faculty of their choosing in investigating the world of research, knowledge generation and dissemination, pedagogical action, and advocacy. Graduates are prepared for academic and leadership positions in teaching, research, and service with a focus on equity and social justice for persons with disabilities.

**Sport Management, MA**
*College of Education*
*Department of Educational Leadership and Sport Management*

**Website:**
education.wsu.edu/graduate/sportmanagement

**Description:** The program offers a Master of Arts in Sport Management (M.A.) degree. Students choose between a thesis and nonthesis (comprehensive exam) option. The program faculty are dedicated to meeting students’ needs as current and future leaders in a variety of sport settings within the sport industry. Given the growing economic and political significance of sport worldwide, there is a strong need for well-educated and professionally-trained sport managers to ensure that sport is managed and well delivered for the greater good of our global society. With that as our goal, the program provides a balance and integration of practical experience, theory, research, and policy. Our degree is based in Pullman and helps graduates build or improve their skills and become successful sport managers. Program alumni have worked in university athletics departments (in the areas of marketing, development, sales, sponsorship, sport information, administration, and compliance) or university and community recreation programs as directors and coordinators of a variety of program areas. Still other graduates have established careers in professional sport teams at the major and minor league levels, sport events, sport media, high school athletics, and other areas. Some alumni went on to pursue doctoral degrees.

Voiland College of Engineering and Architecture

Architecture, MArch
Voiland College of Engineering and Architecture
School of Design and Construction

Website: sdc.wsu.edu/architectural-studies/master-of-architecture/

Description: The Master of Architecture (M. Arch) degree program at Washington State University’s School of Design and Construction is fully accredited by the National Architectural Accrediting Board (NAAB). The M. Arch degree, combined with professional experience approved by the National Council of Architectural Registration Boards (NCARB) and completion of the Architect Registration Examination® (ARE®) ensures one is prepared to practice architecture. Throughout the program students engage in design and scholarship that offers new insights into the role of architecture in our culture, civilization, and environment. Within this context our students challenge existing conventions and offer innovative approaches germane to the critical issues facing the profession of architecture and the world today.

Location(s): Pullman

Admission and Degree Requirements: See admission and degree requirements at sdc.wsu.edu/architectural-studies/master-of-architecture/

Application Deadline: Fall, January 10 (priority)

Licensure: Completing the M.Arch. satisfies the educational requirement on the path to becoming a licensed architect in the US. Use the NCARB Licensing Tool (ncarb.org/get-licensed/licensing-requirements-tool) to see specific requirements in your intended jurisdiction, and contact the department to set up your pathway to become licensed.

Minimum Required Credits: 46 graded; 2 research; 48 total (additional credits may be required depending on student’s academic background)

Chemical Engineering, PhD
Voiland College of Engineering and Architecture
The Gene and Linda Voiland School of Chemical Engineering and Bioengineering

Website: voiland.wsu.edu/graduate/

Description: Faculty research is broadly focused in three synergistic areas: Sustainable Energy and Environmental Systems, Biomolecular and Cellular Engineering, and Biomechanics. Within these areas, projects are focused on chemical and biological catalysis and kinetics; electrochemical engineering; CO2 and plastic recycling; biofilm engineering; novel sensor technologies; cardiac molecular engineering; and musculoskeletal mechanics. Specialized equipment includes a suite of instruments for characterizing reactive surface reactions (operando XPS, XRD and Raman – all with specialized reactors). Unique biological applications of circular dichroism spectroscopy, AFM, and confocal microscopy; robust microelectrode development and application; as well as numerous custom reactors equipped with advanced chemical measurement.

Location(s): Pullman

Civil Engineering, PhD
Voiland College of Engineering and Architecture
Department of Civil and Environmental Engineering
Website: ce.wsu.edu/graduate/
Description: Students may be accepted into the graduate program with undergraduate degrees in other than Civil Engineering (e.g., related areas such as mechanical engineering, materials science, physics, etc.). These students, however, may need to complete additional courses to cover deficiencies. Courses taken to satisfy deficiencies cannot be included in the program of study. Each student, in consultation with his/her graduate committee, will develop a program of study. This plan outlines what courses will be required for completion of the degree. To develop a program of study, students may choose from a variety of graduate and selected undergraduate courses offered in the emphasis. In addition, courses may be selected from several related courses in other programs in the Department of Civil and Environmental Engineering, as well as in other departments of the University. The doctorate program is individually tailored to each student’s need and interest.
Location(s): Pullman, Tri-Cities
Admission and Degree Requirements: See admission requirements at ce.wsu.edu/graduate/application/ and Graduate Student Handbook at ce.wsu.edu/graduate/

Each student, in consultation with his/her graduate committee, will develop a plan of study. This plan outlines what courses will be required for completion of the degree. To develop a plan of study, students may choose from a variety of graduate and selected undergraduate courses offered in the emphasis. In addition, courses may be selected from several related courses in other programs in the Department of Civil and Environmental Engineering, as well as in other departments of the University.

**Location(s):** Pullman, Tri-Cities

**Computer Science, PhD**

*Voiland College of Engineering and Architecture*
*School of Electrical Engineering and Computer Science*

**Website:** [school.eecs.wsu.edu/academics/graduate-program/](school.eecs.wsu.edu/academics/graduate-program/)

**Description:** As the largest unit within this College, the School of Electrical Engineering and Computer Science is instrumental in determining competencies and preparing students at all levels (B.S., M.S., and Ph.D.) for technological productivity. The success of our graduate students in industry and higher education reflects the excellence of the School of EECS and its programs. In industry, our graduate degree holders are presidents, CEOs, CIOs, vice presidents, directors,
and division and department managers. Some have founded at least one company and initiated and promoted new technologies, operations, and sales strategies. Others have excelled as senior designers, project managers, senior scientists, and lead engineers. In higher education, they are professors, deans, and research directors. Graduate degrees have enriched their lives and careers, while affecting positively the economy of the state and nation. All are excellent role models for their peers and our students.

**Voiland College of Engineering and Architecture**

**School of Engineering and Computer Science**

**Website:** [ecs.vancouver.wsu.edu/computer-science-ms](http://ecs.vancouver.wsu.edu/computer-science-ms)

**Description:** The Master of Science in Computer Science is a thesis program requiring a significant research project, as well as course work in the following general areas: algorithms; artificial intelligence; parallel and distributed; computing; computer networks; cloud systems; and computer security. The program has a “Cloud Computing” theme. It refers to a modern set of technologies that span core areas of Computer Science, including computer theory, systems and networks, software development, big data, and artificial intelligence. Our laboratories are equipped with 4 state-of-the-art computing clusters, with a total of 24 nodes, 396 cores, and more than 120TB of networked data storage.

**Location(s):** Vancouver

**Admission and Degree Requirements:** See admission requirements at [ecs.vancouver.wsu.edu/how-apply](http://ecs.vancouver.wsu.edu/how-apply) and degree requirements at [gradschool.wsu.edu/degrees/factsheet/master-of-science-in-computer-science-vancouver/](http://gradschool.wsu.edu/degrees/factsheet/master-of-science-in-computer-science-vancouver/)

**Application Deadline:** Fall, January 10; Spring, July 1

**Minimum Required Credits:** 21 graded; CS700 (9cr); 30 total

Electrical Power Engineering, PSM
Voiland College of Engineering and Architecture School of Electrical Engineering and Computer Science
Website: cea.wsu.edu/PSM

Description: The Electrical Power Engineering PSM (Professional Science Masters) provides core technical education in power systems analysis, transmission and distribution systems and power system economics and electricity markets. You can supplement this core technical work with elective courses in areas ranging from distribution systems to power electronics to power system protection. Complementing this engineering technical education is an engineering professional skills aspect that allows students to select one course from each of the following three categories: a) Managing organizations and projects; b) Managing uncertainty, risk, and finance; and c) Communications, legal, and system engineering management. The PSM culminates in an industry-based internship project. The goal of the PSM is to produce graduates who have both a thorough knowledge of the electric power system and the professional skills needed to advance in both technical and management careers within the industry.

Location(s): Global Campus

Admission and Degree Requirements: See admission requirements at esic.wsu.edu/professional-science-masters-in-electrical-power-engineering/program-requirements/

Application Deadline: Fall, July 1; Spring, November 1

Minimum Required Credits: 27 graded; 30 total

Engineering, MS
Voiland College of Engineering and Architecture Interdisciplinary Degree
Website: vcea.wsu.edu/interdisciplinary-graduate-studies-2/

Description: These interdisciplinary programs are administered through the College of Engineering and Architecture’s Office of the Associate Dean of Research and Graduate Programs, with students typically advised and funded through one of several departments in the College. The interdisciplinary nature of these degrees provides considerable flexibility in designing programs of study tailored to the specialized needs of each student. Areas of specialization include (but are not limited to): biological systems engineering, atmospheric research, materials science and engineering, and bioengineering. Students often work in one of our interdisciplinary centers such as: Bioengineering Research Center (BRC), Center for Environmental, Sediment, and Aquatic Research (CESAR), Center for Environmental Education and Outreach (CEREO), Center for Materials Research (CMR), Engineering Education Research Center (EERC), Laboratory for Atmospheric Research (LAR), and the Wood Materials Research Lab (WMEL). Thesis and nonthesis options are available in the M.S. degree program.
Location(s): Pullman

Admission and Degree Requirements: See admission requirements at vcea.wsu.edu/interdisciplinary-graduate-studies-2/. Contact coordinator for degree requirements.

Application Deadline: Fall, January 10; Spring, July 1

Minimum Required Credits: 21 graded; 30 total

Engineering and Technology Management, METM

Voiland College of Engineering and Architecture
Engineering and Technology Management (ETM) Program
Website: etm.wsu.edu

Description: Washington State University’s Engineering and Technology Management (ETM) program prepares engineering and business professionals to make strategic and operational decisions and become leaders in the management of technology. Courses provide practicing engineers and technical professionals with the knowledge, tools, and skills to manage projects, operations, organizations, and people. The ETM program is specifically tailored for professionals who want to advance their careers while working full time. Live, online classes are available from anywhere and are also recorded and available on demand. The purpose of the WSU Voiland School of Engineering and Architecture Program in Engineering and Technology Management is to prepare students for high-level professional work in positions that require an understanding of management principles in engineering, projects, and organizations. In this program, students will: 1) develop a systematic and analytic framework to support decision making and make effective changes; 2) gain skills to manage changing technology; 3) cultivate business and human resources management skills; 4) learn technical and leadership skills designed to meet today’s—and tomorrow’s—industry needs; and 5) stay at the leading edge and become a leader in the management of technology.

Location(s): Global Campus; Other campus students may register for service courses from the program; PharmD students may be eligible to register for EM classes towards the master’s degree or the certificates.

Admission and Degree Requirements: See admission requirements at etm.wsu.edu/admission/ and degree requirements at etm.wsu.edu/masters-degree/

Application Deadline:
Fall, July 15 (Jan 10 international); Spring, November 15 (July 1 international); Summer, March 15

Interior Design, MA
Voiland College of Engineering and Architecture
School of Design and Construction
Website: sdc.wsu.edu/interior-design/master-of-arts/ Description: The Master of Arts in Interior Design is a terminal professional degree which prepares the graduate to enter professional practice and take NCIDQ exam; to pursue career paths in research and higher education; and to matriculate into a Ph.D. program. The philosophy of the Interior Design program is based on a concern for human beings and the creation of interior settings that support human activities and values. We are focused on how design excellence and innovation can tackle issues surrounding the human condition in the built environment, especially around health and well-being and environmental stewardship. Additionally, we are deeply interested in how qualities of spatial design impact human experience and performance.
Admission and Degree Requirements: See admission requirements at sdc.wsu.edu/interior-design/master-of-arts/m-a-interior-design-admission-procedures/ and degree requirements at sdc.wsu.edu/interior-design/master-of-arts/
Application Deadline: Fall, January 10 Licensure: NCIDQ exam required for certification. Minimum Required Credits: 26 graded; 4 research, 30 total (additional credits may be required depending on student’s academic background)

Mechanical Engineering, MS (Vancouver)  
Voiland College of Engineering and Architecture  
School of Engineering and Computer Science  
Website: ecs.vancouver.wsu.edu/mechanical-engineering-ms  
Description: The Master of Science in Mechanical Engineering is a thesis program requiring a significant research project as well as coursework in the following general areas: solid mechanics; manufacturing and design; robotics and automation; fluid mechanics; heat and mass transfer; and micro/nano technology. The program has a “Digital Design and Manufacturing” theme. It refers to a modern and critical set of digital technologies for advanced modeling, simulation, analysis, integration of information technology, sensing, automation, and big data to rapidly design and manufacture products.  
Location(s): Vancouver  
Admission and Degree Requirements: See admission requirements at ecs.vancouver.wsu.edu/how-apply and degree requirements at gradschool.wsu.edu/degrees/factsheet/master-of-science-in-mechanical-engineering-vancouver/

Molecular Plant Sciences, PhD
Graduate School
Website: mps.wsu.edu/academics/
Description: Graduate study leading to the Doctor of Philosophy degree is offered as an interdepartmental curriculum by graduate faculty from the Departments of Crop and Soil Science, Horticulture, Plant Pathology, Entomology, Chemistry, the Schools of Electrical Engineering and Computer Science, Molecular Biosciences, Biological Sciences, and the Institute of Biological Chemistry. The objectives of the program are to provide the graduate student with a broad knowledge in molecular plant sciences and with research experience in a chosen area within this discipline. Specialization includes cellular and subcellular physiology, the molecular biology and biochemistry of plant-related processes, photosynthesis and photoregulation, nitrogen fixation, phytochemistry, the physiology of vascular plants, metabolism, plant pathogen interactions, hormonal interactions and regulation of growth, crop
production physiology, and physiological ecology as well as related areas in agriculture and biology.

**Location(s):** Pullman

**Admission and Degree Requirements:** See admission requirements at [mps.wsu.edu/admission/](mps.wsu.edu/admission/) and MPS Grad Student Handbook at [mps.wsu.edu/academics/program-requirements/](mps.wsu.edu/academics/program-requirements/)

**Application Deadline:** Fall, January 10

**Minimum Required Credits:** 15 graded; 20 research; 72 total

**Elson S. Floyd College of Medicine**

**Dietetics, Nutrition and Exercise Physiology Coordinated Program, MS**

*Elson S. Floyd College of Medicine*

*Department of Nutrition and Exercise Physiology*

*Website:* [medicine.wsu.edu/nutrition-and-exercise-physiology-degree-program/mscpd/](medicine.wsu.edu/nutrition-and-exercise-physiology-degree-program/mscpd/)

**Description:** The nonthesis Master of Science Coordinated Program in Dietetics, Nutrition, and Exercise Physiology (MS CPD NEP), is a coordinated program (didactic coursework and clinical rotations are conducted simultaneously) in dietetics with an exercise emphasis. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND), the accrediting agency for the Academy of Nutrition and Dietetics (AND). Successful completion of this MS program prepares students to test for the Registered Dietitian Nutritionist (RDN) credential. Since the emphasis area of the graduate dietetics program is exercise, some students may be required to take undergraduate nutrition and/or exercise physiology courses that prepares them to be dual credentialed as a Registered Dietitian Nutritionist (RDN) and a Certified Exercise Physiologist through the American College of Sports Medicine (ACSM). A minimum of 1,000 hours of supervised practice hours in various healthcare and community settings is required as a part of the master’s program.

**Location(s):** Spokane

**Admission and Degree Requirements:** See admission requirements at [medicine.wsu.edu/ms-coordinated-program-in-dietetics-admissions/](medicine.wsu.edu/ms-coordinated-program-in-dietetics-admissions/) Application

**Deadline:** Fall, January 31

**Licensure:** The Master of Science Coordinated Program in Dietetics, Nutrition and Exercise Physiology prepares graduates to take the credentialing exam for Registered Dietitian Nutritionists. This national exam is recognized by the U.S. 50 states, Washington D.C., and U.S. territories. For more information, see [cdrnet.org/state-licensure](cdrnet.org/state-licensure).

Nutrition and Exercise Physiology, PhD
Elson S. Floyd College of Medicine
Department of Nutrition and Exercise Physiology
Website: medicine.wsu.edu/nutrition-and-exercise-physiology-degree-program/phd-nutrition-and-exercise-physiology/
Description: Regular physical activity and proper nutrition are the cornerstones of health promotion and chronic disease prevention. The teaching and research foci of the NEP graduate programs provide advanced training in both disciplines. As a department in the Elson S. Floyd College of Medicine, and with a strong network of clinical and community partner organizations throughout Eastern Washington and beyond, we are well placed to provide training and research opportunities for students interested in clinical and community-based approaches to improving population health. The PhD NEP degree offers intensive research and training experience in the broad fields of nutrition and exercise physiology. Students are matched and work closely with a faculty mentor on research topics with application to clinical, community, and population health.
Location(s): Spokane
Admission and Degree Requirements: See admission and degree requirements at medicine.wsu.edu/phd-nutrition-and-exercise-physiology-admissions/
Application Deadline: Fall, January 31
Minimum Required Credits: 48 graded; 24 research; 72 total

Speech and Hearing Sciences, MS

Elson S. Floyd College of Medicine
Department of Speech and Hearing Sciences
Medical Sciences

Website: medicine.wsu.edu/speech-hearing-sciences-degree-program/

Description: The Department of Speech and Hearing Sciences' master's program in speech-language pathology is based at WSU Spokane. Academic coursework and clinical practicum offerings prepare students to meet the diagnostic and therapy needs of adults and children with a wide variety of speech, language, voice, swallowing, and hearing difficulties. The program stresses the application of theory through work in the University’s clinics, as well as in clinical placements throughout the state and the region. Thesis and nonthesis options are available. Students are prepared as speech-language pathologists to provide direct and consultative services in educational and medical settings. The course of study emphasizes physiological, behavioral, neurological, and psychological dimensions of normal development, fundamental communication processes, and disorders of communication. By applying science and research to clinical practice, graduate students develop proficiency in reasoning and problem-solving relative to clinical principles and procedures in diagnosis and treatment. The academic teaching and learning philosophy are student-centered, research-based, and writing intensive.

Location(s): Spokane

Admission and Degree Requirements: See admission requirements at gradschool.wsu.edu/degrees/factsheet/master-of-science-in-speech-and-hearing-sciences/ and degree requirements at medicine.wsu.edu/speech-hearing-sciences-degree-program/academic-programs/master-of-science/curriculum/

Application Deadline: Fall, January 15

Licensure: WSU Students graduating with a Master of Science in Speech and Hearing Sciences/ Speech-Language Pathology are eligible for licensure and public-school credentialing in all 50 states. Contact the department to set up your pathway to licensure.

College of Nursing

Nursing, PhD

College of Nursing

Website: nursing.wsu.edu/academics/phd/

Description: Enroll in the Ph.D. in Nursing program and learn how to design, conduct, and disseminate research that will generate new knowledge directed toward changing nursing science, healthcare, and nursing practice. You will join a small cohort of nurse scholars, developing supportive relationships with these fellow students and faculty. Faculty and staff are accessible and committed to your success, and you will have regular research and academic mentoring through the establishment of your career as a nurse scientist.

Location(s): Spokane

Admission and Degree Requirements: See admission and degree requirements at https://nursing.wsu.edu/phd/

Application Deadline: Summer, March 15 (Ph.D. program); Fall, March 15 (Bacc. to Ph.D. program)

Licensure: WSU College of Nursing is accredited by the Commission on Collegiate Nursing Education (CCNE). Licensure is recognized in all 50 states. See https://nursing.wsu.edu/about-us/accreditation/for more information.

Minimum Required Credits: 52 graded; 20 research (800-level); 72 total

Nursing (Population Health), MN

College of Nursing

Website: https://nursing.wsu.edu/mn/

Description: The Master of Nursing Population Health (MN PH) is a practice-focused degree that is designed to educate advanced practice nurses to provide direct care to individual patients; manage care for individuals, families, groups, and populations; serve as administrators in health care organizations; engage as faculty in nursing programs; develop and implement health policy; and translate research into expert practice. There are two pathways for admission to the MN PH program: RN-MN (as an RN with a bachelor’s degree in any field) and BSN to MN.

Location(s): Spokane, Tri-Cities, Vancouver

Admission and Degree Requirements: See admission and degree requirements at https://nursing.wsu.edu/mn/

Application Deadline: Fall, March 15; Spring, November 1

Licensure: WSU College of Nursing is accredited by the Commission on Collegiate Nursing Education (CCNE). Licensure is recognized in all 50 states. See https://nursing.wsu.edu/about-us/accreditation/ for more information.

Minimum Required Credits: thesis (29 graded, 6 research, 35 total); nonthesis (29 graded, 3 capstone project, 32 total)

College of Pharmacy and Pharmaceutical Sciences

Pharmaceutical Sciences and Molecular Medicine, MS
College of Pharmacy and Pharmaceutical Sciences
Note: The M.S. in Pharmaceutical Sciences and Molecular Medicine is only available to students in the Ph.D. program.

Pharmaceutical Sciences, PharmD
College of Pharmacy and Pharmaceutical Sciences
Professional Degree
Website: pharmacy.wsu.edu/doctor-of-pharmacy/
Description: The WSU College of Pharmacy and Pharmaceutical Sciences (CPPS) is based in Spokane, Washington on the WSU Health Sciences campus. In 2015, the college also established a Doctor of Pharmacy extension in Yakima, Washington, located on the Pacific Northwest University campus. The college was founded in 1891 and is noted for its 4-year Doctor of Pharmacy program and research in drug discovery, cancer biology, neuroscience, pharmacogenomics, drug delivery and nanotechnology, and dietary supplements. Along with a Doctor of Pharmacy program, and PhD degree in Pharmaceutical Sciences and Molecular Medicine, the college offers several dual degree programs and certificates in business administration, engineering, and technology management, as well as communications. The college also oversees the United States Transuranium Registries, which studies the biokinetics, dosimetry and biological effects of radiation in humans. In addition, the college operates the Drug Information Center which serves health care providers including pharmacists, doctors, and nurses in Washington state. The college has over 150 faculty and staff, and 600 students. Graduates go on to work in government, research, hospitals, community pharmacies, and academia. To learn more, visit pharmacy.wsu.edu/
Location(s): Spokane, Yakima (extension)
Admission and Degree Requirements: See admission requirements at pharmacy.wsu.edu/doctor-of-pharmacy/admissions/ and Student Handbook at pharmacy.wsu.edu/doctor-of-pharmacy/current-student-resources/advising/
Application Deadline: October 1, 2021 (priority deadline); January 4, 2022 (regular deadline)
Minimum Required Credits: 135 graded; 135 total

**Website:** [graduate.vetmed.wsu.edu/participating-programs/iid/overview-of-the-iid-program](http://graduate.vetmed.wsu.edu/participating-programs/iid/overview-of-the-iid-program)

**Description:** We offer outstanding doctoral education in immunology, epidemiology, and host-pathogen interactions of bacterial, parasitic, and viral infections of animals and humans. Together the major professor and graduate student trainee develop a directed course of research. Throughout the training period, all graduate students attend weekly research seminars where faculty and trainees present recent results. The goal of trainee participation in these seminars is exposure to critical analysis of data, experimental design, and discussion of research significance. Trainees are expected to conduct original research leading to a significant contribution to knowledge in the trainee’s area of emphasis and culminating in publication in leading international scientific journals. This publication is required for and constitutes the dissertation. The final examination is preceded by a public presentation of the research, attended by the faculty, graduate students, and post-doctoral fellows, followed by an oral examination.

Biomedical Sciences (Integrative Physiology and Neuroscience), MS

*College of Veterinary Medicine*
*Integrative Physiology and Neuroscience (IPN) Program*

**Website:** [ipn.vetmed.wsu.edu/veterinary-sciences](http://ipn.vetmed.wsu.edu/veterinary-sciences)

**Description:** The Master’s program in Veterinary Sciences: Integrative Physiology and Neuroscience (IPN) is a very flexible program ideally suited for those students interested in pursuing master’s level graduate work with a faculty member in IPN but not interested in the Neuroscience program. This often includes (but is not limited to) faculty in the muscle/biomechanical group in the department. Because of the wide range of potential thesis topics, the selection of appropriate class work for an individual student’s program is left to the discretion of the student and their mentor. Classes typically include some background courses as well as graduate seminars, professional development opportunities, and a course in proposal writing and presentation. The primary difference between the MS and PhD programs is that the depth of the thesis project for a MS degree is significantly less than the dissertation project for the PhD degree. Because of the short time to completion, students pursuing a MS degree do not participate in rotations and must have an identified mentor before they enter the program.

**Location(s):** Pullman

**Admission and Degree Requirements:** See admission requirements at [vmp.vetmed.wsu.edu/graduate-programs/combined-programs-phd/application](http://vmp.vetmed.wsu.edu/graduate-programs/combined-programs-phd/application). Contact department for degree requirements.

Molecular Biosciences, PSM
College of Veterinary Medicine
School of Molecular Biosciences
Website: smb.wsu.edu/academic-training/graduate-studies/PSM
Description: The Professional Science Master’s in Molecular Biosciences (PSM-MB) is designed to help students transition into the workplace by training them in skills that employers need. This master’s degree (PSM-MB), offered in the School of Molecular Biosciences (SMB), combines science with training in ethics and business, bridging the gap between academia and the workplace. An important career-oriented aspect of the program is that it requires an internship with practical training, rather than a thesis. Location(s): Pullman, Global Campus
Admission and Degree Requirements: See admission requirements at smb.wsu.edu/academic-training/graduate-studies/PSM/admission-application and PSM Student Handbook at smb.wsu.edu/academic-training/graduate-studies/PSM/resources
Application Deadline: Fall, June 1 (March 1 (international); Spring, November 1 (June 1 (international)

Neuroscience (Integrative Physiology and Neuroscience), MS
College of Veterinary Medicine Programs in Neuroscience
Website: ipn.vetmed.wsu.edu/neuroscience/graduate
Description: Neuroscience is the study of the nervous system from elementary molecular events to integrative outputs such as behavior and autonomic control. The program in Neuroscience at WSU includes classroom discussions of primary neuroscience literature, courses designed specifically to teach students scientific reasoning and training in proposal writing and oral presentation skills. However, the bulk of the program is spent pursuing a scientific question that includes the design and completion of an original investigation. Students develop their project under the expert guidance of well-funded and renowned neuroscientists on the faculty at WSU. Members of the graduate faculty in the Program in Neuroscience comes from multiple departments, colleges, and campuses from across the University, thus giving students a broad selection of mentors and potential topics for their thesis research.
Location(s): Pullman
Admission and Degree Requirements: See admission and degree requirements at ipn.vetmed.wsu.edu/neuroscience/graduate
Application Deadline: Fall, December 1
Minimum Required Credits: 21 graded; 30 total

Applied Measurement and Quantitative Methods Certificate

*College of Arts and Sciences Department of Psychology*
*College of Education*
*Department of Kinesiology and Educational Psychology*

**Website:**
education.wsu.edu/graduate/edpsych/quantitativediscipline/science/quantitative/methods/certificate/

**Description:** The graduate Certificate in Applied Measurement and Quantitative Methods, administered by the Department of Psychology in the College of Arts and Sciences and Educational Psychology in the College of Education, provides advanced knowledge and training in methods typically employed to investigate a wide variety of problems in the broad domains of the social and behavioral sciences. The certificate leverages expertise across colleges to provide students in a variety of disciplines with advanced proficiency in quantitative methods and educational and psychological measurement. Students will gain the expertise to produce, analyze, and report empirical information to drive decision-making and understanding complex environments.

**Location(s):** Pullman

**Admission and Certificate Requirements:** See admission requirements and certificate requirements at education.wsu.edu/graduate/edpsych/methods/graduate/certificate/

Educational Research Methods Certificate

*College of Education*
*Department of Kinesiology and Educational Psychology*

**Website:**
education.wsu.edu/graduate/edpsych/methods/certificate/

**Description:** There is a growing need among social science professionals to have sufficient methodological skills to produce, analyze, synthesize, report, and consume information so that decisions can be made using an evidence-based approach. That is why this certificate was created. In addition, considering the complex nature of contemporary societal problems, the certificate seeks to fill a broader need in our university to train and support graduate students to use different methods to approach complex problems.

**Location(s):** Pullman

**Admission and Certificate Requirements:** See admission requirements and certificate requirements at education.wsu.edu/graduate/edpsych/methods/certificate/

**Minimum Required Credits:** 15 graded; 15 total

Bioethics Certificate
College of Arts and Sciences
School of Politics, Philosophy, and Public Affairs
Website: online.wsu.edu/online-degrees/certificates/bioethics-graduate-certificate/
pppa.wsu.edu/graduate-studies/graduate-certificate-in-bioethics/
Description: As science expands medical boundaries, society faces tough new questions on such topics as assisted suicide, genetic testing, and stem cell research. WSU’s online Graduate Certificate in Bioethics program teaches students how to weigh competing social and individual interests using ethical theories. The certificate enhances employment opportunities in three main areas: Health care, including the bio-tech industry as well as hospitals, nursing homes, and public health organizations; Legal work, including law firms, hospital consulting, bioethics centers, medical societies, international organizations, and non-governmental organizations; and Academic, including such fields as philosophy, anthropology, biology, history, politics, and sociology.
Location(s): Pullman, Global Campus

Bioinformatics Certificate
College of Arts and Sciences
School of Biological Sciences
Website: sbs.wsu.edu/graduate-certificate-in-bioinformatics/
Description: The certificate emphasizes the acquisition of biological and computational expertise by supplementing graduate students’ existing background with necessary training in molecular biology, genomics, and/or computer science. There is a clear need for the development of expertise to analyze the growing amount of biological data generated from genomic, phenotypic, environmental, and other sources. The goal of the certificate is to provide the coursework and a rich academic environment for graduate students to synthesize information across multiple disciplines. The certificate aims to prepare highly qualified graduate students who have rigorous multidisciplinary training in molecular biology, genomics, and computer science. The certificate is aimed at graduate students in engineering, sciences, computer science, and agriculture, although students from other colleges may also find it valuable. The primary objective is to provide students an interdisciplinary training in bioinformatics. Our goal is to develop a critical scientific understanding of bioinformatics, including the biological and computational aspects of algorithm development and implementation.
Location(s): Pullman, Spokane, Tri-Cities, Vancouver
Admission and Certificate Requirements: See admission and certificate requirements at sbs.wsu.edu/graduate-certificate-in-bioinformatics/ Minimum Required Credits: 12 graded; 12 total

C-NSPIRE: Carbon and Nitrogen Systems
Policy Oriented Research and Education

Graduate School
Center for Environmental Research, Education, and Outreach
Website: cereo.wsu.edu/c-nspire-certificate-program/
Description: The certificate is aimed at graduate students with environmental interests in engineering, sciences, and agriculture, although students in the social sciences and other disciplines may also find it valuable and are encouraged to participate. The primary objective is to provide students with an interdisciplinary perspective of the science related to the global N- and C-cycles and to introduce students to public policy studies. The C and N cycles are closely coupled and associated with global sustainability issues related to climate change, air and water quality, and other environmental impacts. Given the complexities of the C and N cycles, policy solutions to mitigate the environmental impacts require an integrated management approach.

Location(s): Pullman
Admission and Certificate Requirements: See admission and certificate requirements at cereo.wsu.edu/c-nspire-certificate-program/cnspire-requirements/
Application Deadline: Fall, August 1; Spring, December 1; Summer, April 1
Minimum Required Credits: 13 graded; 13 total

Constraints Management Certificate
Voiland College of Engineering and Architecture Engineering
and Technology Management Program Website: etm.wsu.edu/certificate-program/constraints-management/
Description: The Theory of Constraints (TOC) certificate focuses on the management of the limiting factors of any system. By providing specific methods of managing variability, TOC creates exceptional performance very quickly and then encourages a process on an on-going improvement through the focused use of LEAN and Six Sigma tools. The TOC methods apply to every level of the organization and at every level of maturity. As a result, using TOC over time results in a stable and ever-improving organization. This three-course certificate teaches the TOC proven solutions and the TOC thinking process for new solutions. It includes managing people, processes, projects, finances, and strategy for a company.

Location(s): Global Campus
Admission and Certificate Requirements: See admission and certificate requirements etm.wsu.edu/certificate-program/
Application Deadline: Fall, July 15 (Jan 10 international); Spring, November 15 (July 1 international); Summer, March 15
Minimum Required Credits: 9 graded; 9 total

Digital Humanities and Culture Certificate

College of Arts and Sciences
Digital Technology and Culture Program
Department of English
Website: dtc.wsu.edu/graduate-certificate/
Description: The Digital Humanities and Culture Graduate Certificate emphasizes the critical analysis and creative production of digital media in a global context. The certificate brings together the social, cultural, historical, and technical affordances of digital culture through humanistic inquiry and computational frameworks. Fulfilling the requirements of the certificate prepares students for problem solving outreach and engagement locally and globally. More than learning a specific technology or computing platform, a graduate certificate in Digital Humanities and Culture challenges students to learn how, when, and most importantly why to use technology to solve a range of social, educational, technical, and/or political problems for information technology companies, political advocacy groups, social justice projects, institutions of higher education and beyond. Merging theory and practice, the Digital Humanities and Culture certificate provides a foundation for critical digital literacy and computation. Designed to enhance already existing graduate programs in the humanities and the social sciences, the graduate certificate in Digital Humanities and Culture offers graduate-level coursework in critical methods, textual analysis, composing practices, and hands-on production for engaging with humanistic studies in, as well as about, digital environments. Sharing the vision of the College of Arts and Sciences to, “Connect faculty and students across disciplines and campuses to enable them to address problems that transcend disciplinary boundaries,” the graduate certificate in Digital Humanities and Culture brings together courses, students, and faculty with an emphasis on the interdisciplinary strengths of the Digital Technology and Culture program and the English Department.

Education Technology Across the Curriculum Certificate

College of Education
Department of Teaching and Learning
Website: education.wsu.edu/graduate/graduatecertificates/cetak/
Description: The Graduate Certificate in Education Technology Across the Curriculum allows students to develop skills and obtain documentation that will help them obtain positions across disciplines that require knowledge of and experience with education technology around the world. The coursework comprises 15 hours that address International Society for Technology in Education (ISTE) standards and disciplinary standards, and it focuses on developing knowledge and skills for working with diverse students and communities. The required coursework emphasizes research, theoretical, and practical issues concerning effective uses and affordances of technologies and the implementation of appropriate classroom teaching techniques.
Location(s): Pullman

Engineering and Technology Management Certificate

Voiland College of Engineering and Architecture
Website: igert.eecs.wsu.edu/certificate-
health-assistive-smart-environment-design

Description: People have always lived in places that provide shelter and basic comfort. As society and technology advance there is a growing interest in adding intelligence to our living and working environments. Expertise in machine learning, pervasive computing, and sensor networks has matured to the point where they can be integrated into a new field known as smart environments. A major societal impact of smart environments is assisting people with special health needs. To most people home is a sanctuary, yet today those who need special care often must leave home to meet medical needs. Our workforce needs individuals who are trained in engineering, psychology, and health care and are poised to make scientific advances in this field that will benefit society.

Location(s): Pullman

Admission and Certificate Requirements: See admission and certificate requirements at igert.eecs.wsu.edu/certificate-health-assistive-smart-environment-design/index.html

Application Deadline: Fall, January 10; Spring, July 1

Minimum Required Credits: 12 graded; 12 total

Global Justice and Security Studies Certificate
College of Arts and Sciences
School of Politics, Philosophy, and Public Affairs Website: pppa.wsu.edu/graduate-studies/m-a-in-political-science-certificate-in-global-justice-security-studies/

Description: Students are given an option of pursuing an M.A. degree in Political Science with a graduate certificate in Global Justice and Security Studies (GJSS). This nonthesis, terminal degree is designed to provide students with a specialized qualification better suited for the pursuit of professional careers in federal, state, or local government. The GJSS program targets students intending to pursue non-academic, governmental careers as practitioners, whether it be in the field of homeland security, law enforcement, not-for-profit organizations, NGOs, or as analysts within the U.S. intelligence or defense communities. The master's in GJSS is geared towards providing students with maximum flexibility in constructing their specific areas of specialization, while at the same time providing the common elements needed for a coherent program of study. Faculty work closely with students to tailor the GJSS program of study to best fit their own individual professional needs.

Location(s): Pullman

Admission and Certificate Requirements: See admission requirements at pppa.wsu.edu/graduate-studies/admissions-and-application-information/ and Graduate Handbook at pppa.wsu.edu/graduate-studies/student-handbook-and-services/

Application Deadline: Fall, January 10
Minimum Required Credits: The M.A. with the GJSS certificate has 27 graded credits, 31 total.

Health Communication and Promotion Certificate
Edward R. Murrow College of Communication
Website: murrow.wsu.edu/academics/murrow-online/grad-cert-comhlth/
Description: Washington State University’s online Certificate in Health Communication and Promotion is designed for individuals who want to advance their professional credentials in health communication advertising, public relations, and digital communications outreach. The coursework comprises 12 hours that address best practices in market research techniques, multimedia content creation, crisis communication, professional ethics, and research methods. The required coursework is tailor-made for current and aspiring health communication specialists, public relations practitioners, public information officers or other professionals seeking to enhance or hone core competencies in health communication practices. Courses are rooted in the foundation of research and theory in partnership with courses that teach students best practices and industry standards in contemporary health communication strategies and tactics.
Location(s): Global Campus
Admission and Certificate Requirements: See admission and certificate requirements at murrow.wsu.edu/academics/murrow-online/grad-cert-comhlth/

Application Deadline: Fall, August 1; Spring, December 1; Summer, April 15

Human Nutrition Certificate
Elson S. Floyd College of Medicine
Department of Nutrition and Exercise Physiology
Website: medicine.wsu.edu/nutrition-and-exercise-physiology-degree-program/
Description: Human nutrition skills and knowledge are increasingly in demand for diverse professional careers in academia, industry, and government. For example, food scientists within the food industry will need to interact with nutritionists and dietitians; Plant breeders are increasingly selecting varieties based on nutrient characteristics and thus need to understand human nutrition concerns. The Graduate Certificate in Human Nutrition provides a guided mechanism for WSU graduate students in any discipline to 1) develop an understanding of nutrition research and current issues in nutrition 2) improve their own research and course of study using this knowledge 3) earn a certificate of acknowledgment for their additional concentration in nutritional sciences. The certificate will aid graduates and prospective employers by identifying and recognizing additional graduate-level coursework in human nutrition.
Location(s): Spokane
Admission and Certificate Requirements: Interested applicants must first 1) be current WSU graduate students in another discipline or 2) apply and be granted admission to the WSU Graduate School as a part-time certificate student before taking their first Certificate course. Contact department for admission and certificate requirements.
Application Deadline: Rolling
Minimum Required Credits: 9 graded; 9 total

Logistics and Supply Chain Management Certificate

Voiland College of Engineering and Architecture Engineering and Technology Management Program Website: etm.wsu.edu/certificate-program/logistics- and-supply-chain-management/
Description: Every organization has internal supply chains, and links to external suppliers and customers. Interlinking organizations span the spectrum from raw materials to finished products and services in the hands of the consumer. The supply chain extends even to the final disposition of the commodities we consume from concept to grave. The structured dependency of such chains and the uncertainty of forecasts and systemic delays are amplified as individual links in the supply chain to try to optimize their performance. Even minor changes in the market can cause wild swings in economic performance.
Modern design for manufacturability, six sigma quality, operation theories, information systems such as ERP systems, and theory of constraints hold the promise of stabilizing some of the variability by providing visibility along the whole supply chain.
Additional control and operational performance factors are needed to provide a complete solution. This four-course certificate examines the strategy and tactics of supply chain management to include "how to" techniques to implement, measure and reward the individual links in the supply chain.

Industrial Leadership Certificate
Voiland College of Engineering and Architecture Engineering and Technology Management Program Website: etm.wsu.edu/certificate-program/industrial-leadership/
Description: Manufacturing and technical managers in today’s manufacturing environments must demonstrate multifaceted leadership combined with a high level of technical expertise to compete in a world-class manufacturing arena. The four courses in this certificate provide a unique but essential foundation for understanding and optimizing a manufacturing organization. While many courses in manufacturing focus on mechanical operations and processes, this certificate focuses on maximizing the performance of the entire system. Achieving the highest levels of performance starts with design of products and systems, integrating the contributions of a complex network of suppliers, and coordinating production according to key constraints throughout the supply chain. Finally, the most effective route to achieving continuous improvement in this environment is the integrated application of Lean, Six Sigma, and Theory of Constraints.
Location(s): Global Campus
Admission and Certificate Requirements: See admission and certificate requirements etm.wsu.edu/certificate-program/
Application Deadline: Fall, July 15 (Jan 10 international); Spring, November 15 (July 1 international); Summer, March 15

**Nurse Educator Certificate**

*College of Nursing*

**Website:** nursing.wsu.edu/academics/graduate-certificates

**Description:** The nurse educator certificate program, a track within the Master of Nursing Population Health (MN-PH) graduate nursing program, includes the completion of four theory courses that focus on teaching and learning, with an emphasis on distance friendly educational pedagogy. The program also is open to post-master’s students wishing to focus on nursing education. Each course is designed to be primarily web based with some videoconferencing class sessions. Additional practicum experiences can be arranged; the NURS 556 capstone practicum (a requirement for all MN-PH students) also offers opportunities for an educational focus.

**Location(s):** Spokane, Tri-Cities, Vancouver

**Admission and Certificate Requirements:** See admission and certificate requirements at nursing.wsu.edu/academics/certificate-nursing-leadership

Project Management Certificate

**Voiland College of Engineering and Architecture Engineering and Technology Management Program**  
**Website:** [etm.wsu.edu/certificate-program/project-management/](etm.wsu.edu/certificate-program/project-management/)

**Description:** It is necessary for project managers to update their skills in modern project management techniques to effectively contribute to the continuing growth of the industry. The increasing complexity of project management requires the one in charge to understand the many facets to become/remain proficient in the field. The four-course PM certificate provides the recipients with the skills to manage any type of project. It is a fact that all technology managers will have to also manage projects, and it is necessary that these projects be managed professionally. Many professionals have reported that this certificate has allowed them to advance in their careers as a project manager and as a technology manager.

**Location(s):** Global Campus  
**Admission and Certificate Requirements:** See admission and certificate requirements at [etm.wsu.edu/certificate-program/](etm.wsu.edu/certificate-program/)
Application Deadline: Fall, July 15 (Jan 10 international); Spring, November 15 (July 1 international); Summer, March 15

Minimum Required Credits: 12 graded; 12 total

Protein Biotechnology Certificate
College of Agricultural, Human, and Natural Resource Sciences Interdisciplinary Certificate
Website: nihbiotech.wsu.edu/
Description: The NIH Protein Biotechnology Training Program at Washington State University offers interdisciplinary training to enhance the graduate experience and produce versatile scientists and engineers to address biotechnological needs in academic, industrial, or government service. The program provides state-of-the-art training in translating basic science into applied biotechnology, with an emphasis on protein science. Admission of Program Trainees is via nomination by a participating doctoral program: Department of Chemistry; School of Chemical Engineering and Bioengineering; School of Molecular Biosciences; Program in Molecular Plant Sciences; and Program in Immunology and Infectious Diseases. Trainee positions are supported by a grant from the National Institute of General Medical Sciences, part of the National Institutes of Health, and Washington State University contributions.

Location(s): Pullman

Admission and Certificate Requirements: Contact a relevant participating department for more information. Students develop Individual Development Plans (IDP) to track their professional development.

Application Deadline: Applications to join the Biotech Program are reviewed each March. Applicants must be accepted or enrolled in a participating PhD program at WSU before the deadline. Minimum Required Credits: Varies

Research Communication Certificate
Graduate School
College of Arts and Sciences
Edward R. Murrow College of Communication Interdisciplinary Certificate
Website: gradschool.wsu.edu/graduate-certificate-program/ (Contact Allison Coffin for specifics on the Research Communication Certificate)
Description: There is growing recognition of the need for scientists and other STEM professionals to have better communication skills. WSU’s interdisciplinary research communication Graduate Certificate will teach students how to communicate with diverse audiences in a variety of formats, including face-to-face conversations, formal presentations, written content, and multimedia formats. This Certificate will equip students with communication skills for a variety of careers, including careers in academia, industry, science policy, and science communication and outreach.

Location(s): Everett, Pullman, Spokane, Tri-Cities, Vancouver

Admission and Certificate Requirements: Contact Allison Coffin for admission and certificate requirements.

Application Deadline: Fall, August 1; Spring, December 1; Summer, April 15

Minimum Required Credits: 9 graded; 9 total

**Sigma Quality Management Certificate**

*Voiland College of Engineering and Architecture*
*Engineering and Technology Management Program*

**Website:** etm.wsu.edu/certificate-program/six-sigma-quality-management/

**Description:** A concentration of six quality improvement courses can be taken as a part of the engineering management master’s degree, or as a part of the Quality Management Certificate. The four-course certificate provides training in Six Sigma principles relevant to strategic and operational decisions using state-of-the-art knowledge, tools, and skills in improving quality. This certificate is for engineers and non-engineering professionals in technology management holding a bachelor’s degree in engineering, technical, or management areas.

**Location(s):** Global Campus

**Admission and Certificate Requirements:** See admission and certificate requirements etm.wsu.edu/certificate-program/

**Application Deadline:** Fall, July 15 (Jan 10 international); Spring, November 15 (July 1 international); Summer, March 15

**Minimum Required Credits:** 12 graded; 12 total

**Strategic Communication Certificate**

*Edward R. Murrow College of Communication*

**Website:** murrow.wsu.edu/academics/murrow-online/grad-cert-stratcomm/

**Description:** Washington State University’s online Certificate in Strategic Communication is designed for those who want to excel in advertising, public relations, corporate communication, and communication management. The degree will advance and energize your career. Our multidisciplinary approach offers training in new and traditional media, critical for today’s strategic communications; teaches students how to gather and analyze information and use those findings in creating communication campaigns; trains students, in the tradition of Edward R. Murrow, to create messages that are both strategic and responsible; includes weekly online instructor office hours, frequent student self-assessment tools, ongoing interaction with other students, and a flexible timeline for completion. The program offers hands-on training in the most advanced platforms, tools, and techniques. You will work closely with industry professionals and faculty to learn audio and video software, graphic design tools, new media, and publication layouts. By the time you are finished, you will have created multimedia materials that are evaluated by peers and produced as portfolio-quality items stored online.

This work can be tailored to each individual career, or even your specific job needs.

**Location(s):** Global Campus

**Admission and Certificate Requirements:** See admission and certificate requirements at murrow.wsu.edu/academics/murrow-online/grad-cert-stratcomm/

**Application Deadline:** Fall, August 1; Spring, December 1; Summer, April 15

**Minimum Required Credits:** 12 graded; 12 total

**Sustainable Agriculture Certificate**

*College of Agricultural, Human, and Natural Resource Sciences*
*Department of Crop and Soil Sciences*

**Website:** css.wsu.edu/graduate-studies/graduate-certificate-in-sustainable-agriculture/

**Description:** The Graduate Certificate in Sustainable Agriculture provides post-baccalaureate students with an interdisciplinary understanding of practices and current issues in sustainable agriculture, along with the science that makes it work. Students who earn the Graduate Certificate in Sustainable Agriculture may take these skills into all industries and agencies involved in the food chain, from production, processing, and delivery to policy, regulation, and education.
Systems Engineering Management Certificate
Voiland College of Engineering and Architecture
Engineering and Technology Management
Program Website: etm.wsu.edu/sem/
Description: Systems engineering provides a rigorous framework for the design and deployment of complex socio-technical systems across many different domains supporting the collaboration of engineers and scientists in developing, delivering, and sustaining affordable total system solutions to complex global problems. To this end, engineers, scientists, and leaders require a deep understanding of system concepts from stakeholder needs to unintended consequences and sustainability.

Designed with engineers, project managers, and leaders in mind, the three-course systems engineering management graduate certificate covers system concepts, system design, system analysis, system risk, and system sustainability. Each course broadens the student's systems thinking ability and enables the student to master the creation of key systems engineering artifact for their system of choice, including a Systems Engineering Management Plan (SEMP) aligned with a Project Management Plan (PMP), a risk management plan, and a set of life cycle and system effectiveness analyses that address performance, risk, cost, and sustainability. The curriculum focuses on leadership across the system life cycle. The main takeaway is the cultivation of a systems mindset that enables the student to effectively manage global challenges and lead efforts that bring complex system solutions to life.

Location(s): Pullman, Global Campus
Application Deadline: Fall, January 10; Spring, July 1
Minimum Required Credits: 9 graded; 9 total

Teaching College Mathematics Certificate
College of Arts and Sciences
Department of Mathematics and Statistics
Website: math.wsu.edu/graduates/ Description: This certificate program allows students to become familiar with modern theories of learning and research-based pedagogical strategies that are effective for the college mathematics classroom. Students will complete coursework, teach undergraduate courses, be evaluated by experienced faculty, and write a teaching philosophy statement to better prepare them for a career involving post-secondary instruction. Currently available to students enrolled in a Department of Mathematics and Statistics graduate program on any campus. Exceptions can be made on a case-by-case basis.

Location(s): Pullman, with participation systemwide
Admission and Certificate Requirements: See math.wsu.edu/graduates/ for information on the Department of Mathematics and Statistics graduate programs. Contact department for more information regarding specific admission and certificate requirements.
Application Deadline: Fall, March 1; Spring, October 1
Minimum Required Credits: 12 graded; 12 total
Location(s): Pullman

Water Resources Science and Management Certificate

School of the Environment Water Research Center Interdisciplinary Certiﬁcate
Website: wrc.wsu.edu/news/wrsm-graduate-certiﬁcate-program/
Description: This certiﬁcate program will provide students of our natural and social systems, and therefore must be managed carefully. Threats to freshwater resources come from a diversity of sources, often encompassing not a single issue, but a series of interlinked problems with common themes. Managing water sustainability in the face of these complex problems requires a broad understanding of both the physical water system and the short- and long-term impacts our decisions about water have on populations, economies, and ecosystems. Our goal is to with an interdisciplinary understanding of the physical, social, and cultural drivers that shape how water is managed within the larger environmental and human landscape. Water is an important resource for maintaining both the health and integrity provide students with the breadth of knowledge required to critically understand these freshwater issues.

Location(s): Pullman, Vancouver
Admission and Certificate Requirements: See admission and certificate requirements at wrc.wsu.edu/news/wrsm-graduate-certiﬁcate-program/
Application Deadline: Fall, rolling; Spring, rolling

Minimum Required Credits: 9 graded; 9 total
